Skills and Experience = Dynamic Training

Mindworks director, Laurie Kelly, speaks both nationally and internationally on current knowledge of how the mind works to maximize the Impact of Training, and to create an Openness Factor in our approach to Change and new Learning.

Our most popular course is our Trainer Intensive program, 'Maximizing Your Training & Teaching Impact'. This is Professional Development for trainers at its very best, modeling techniques and processes that are Brain-friendly and designed specifically to excite and engage the learner to go far beyond what they thought was possible.

Laurie offers powerful Professional Development for all trainers & educators – often they have completed the TAE40110 without an elective that focuses solely on delivery, which is where this invaluable course excels. Laurie Kelly's experience also includes Conference Keynote & Workshop sessions and Public and In-house training programs, delivered in Australia and overseas. He has worked extensively within many departments of the Government Sector, and within the areas of Education, Health, Resources, Council and Corporate organizations. Laurie is one of the most sought-after Presenters in his field.
