### WHAT CAN GLADSTONE ENGINEERING ALLIANCE DO FOR YOU?

GEA facilitates a wide range of projects and initiatives across the Region and is proactive in providing relevant advice, statistical information, business development workshops and networking opportunities to support small to medium business, industry and government.

A proactive organisation, GEA is dedicated to;

- Encouraging business development, innovation and capacity building
- Providing information and communication to develop skills and knowledge
- Enhancing workforce development and higher skills learning
- Advocating for sustainable regional and economic growth
- Proactively representing, supporting and promoting the capability, competitiveness and interests of GEA Members
- Sourcing work opportunities and education on supplier expectations

The information printed in this directory is current and includes financial members who entered their data as of November 1, 2019.

This member directory is updated quarterly, for your company to be added please ensure you are a current GEA Member.

# THE GLADSTONE REGION

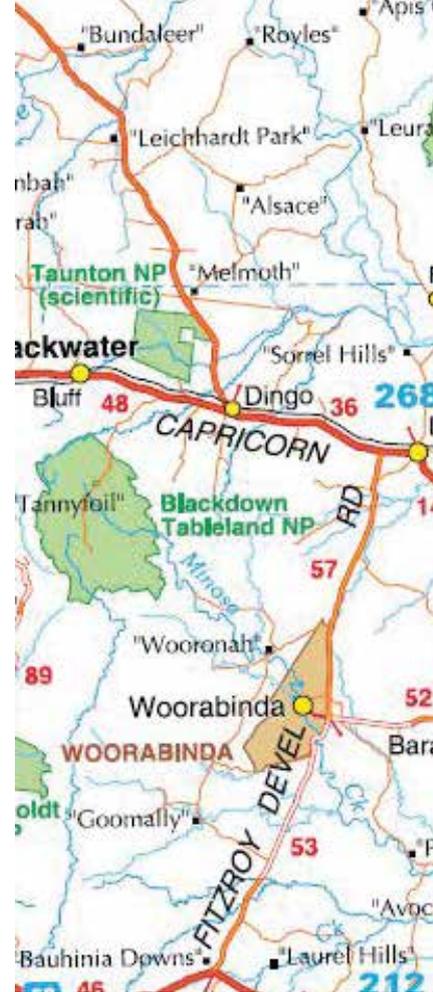

The Gladstone Region is a thriving and vibrant region which has a diverse economy based on its worldwide reputation as Australia's industrial powerhouse.

The region is 'the land of the giants' with two of the world's largest alumina refineries, Queensland's largest multi commodity port, Australia's largest cement manufacturer, 7% of the world's LNG, and a number of other major industrial plants locally.

Due to the diversified industrial sector and the dynamic small to medium size businesses operational in the region, Gladstone is known for its highly skilled supply chain, experienced workforce and diverse resource sector.

A globally competitive industrial base, with continuing expansions and developments, the region is now becoming the prime location for domestic and international investors who see the worthwhile economic benefits of doing business in such a diversified and progressive industrial landscape.

Gladstone has always maintained a "work and play" attitude by offering a balance of established processing industries with a strong retail and service sector. Along with tourism and primary production our region provides abundant choices for workers and opportunities for business people.

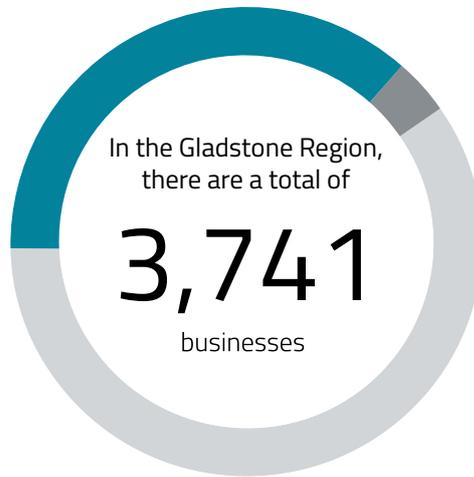

## ECONOMIC SNAPSHOT

Sources: Queensland Government's Statisticians, Queensland Resources Council and the Gladstone Regional Council. Disclaimer: The information contained has been obtained from sources believed to be reliable. Gladstone Engineering Alliance (GEA) take no responsibility for errors in data.

### SME'S – THE BACKBONE TO OUR ECONOMY

SME's are the heart of the resource sector, it is their efficient, collaborative and innovative approach that ensures the longevity of the industry. GEA consistently works with SME's to provide programs and support, previously out of reach.

**35.2%**  
 'Small' businesses  
 (19 or fewer employees)

**2.7%**  
 'Medium' businesses  
 (20 to 199 employees)

### STIMULATING OUR ECONOMY

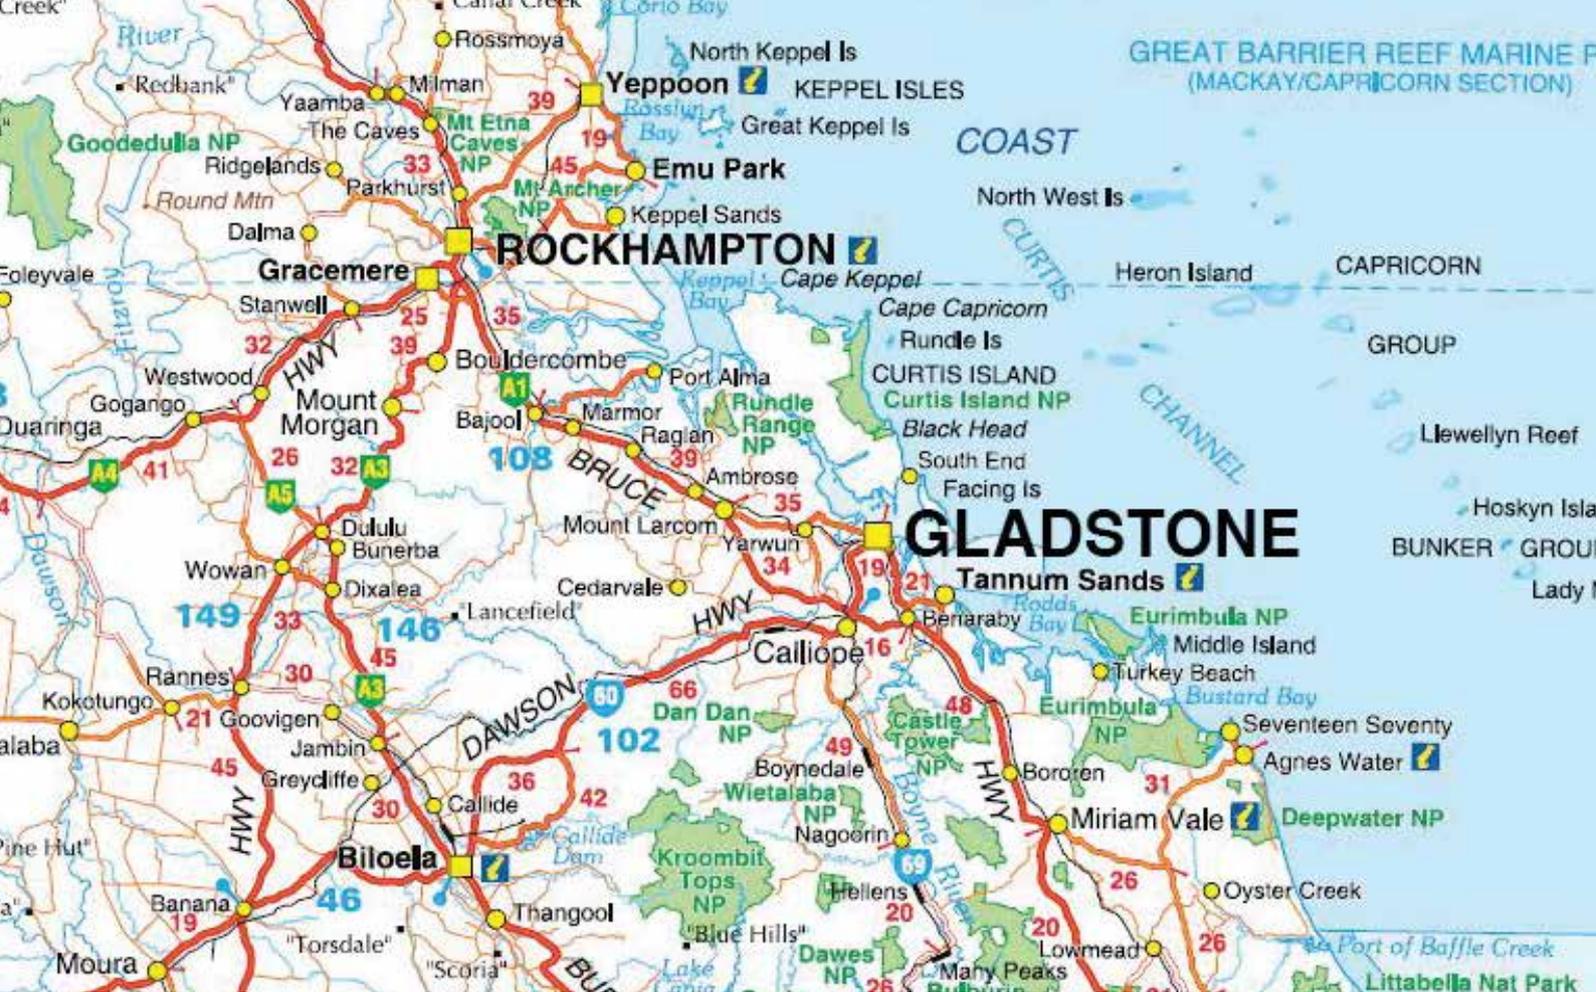

GEA have shown a genuine commitment to increase local participation in industry procurement, by helping our businesses become 'supply chain ready' and advocating as a collective voice on their behalf.

We are committed to working with industry to deliver supply chain opportunities to local operators, and to being a convenient communication point for industry and local businesses.

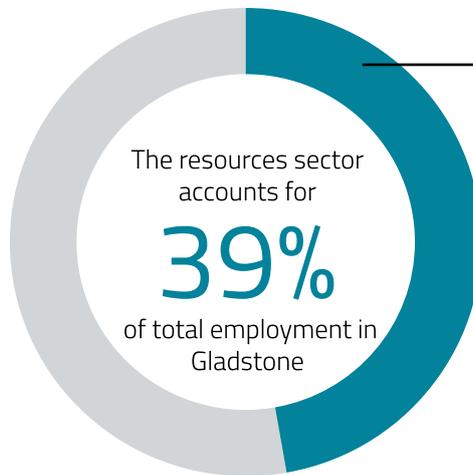

GEA act as a collective voice capable of lobbying Industry, Council and Government to source locally.

Sources: Queensland Government's Statisticians Office, Queensland Resources Council.

Disclaimer: The information contained has been obtained from sources believed to be reliable. Gladstone Engineering Alliance (GEA) take no responsibility for errors in data.

## PURPOSE FOR OUR PEOPLE

GEA provide **skills development and training, corporate and higher learning, networking and contacts** to ensure Gladstone remains a region of choice for employment and opportunity.

## INVESTING IN OUR FUTURE

Through the encouragement of:

- ✓ **Diversification**
- ✓ **Active sourcing of inbound investment**
- ✓ **Development of the supply chain**
- ✓ **Identification of supply gaps**

GEA supports the resources sector and SME's alike. GEA are a self-governing, business driven organisation advocating for business and industry to connect opportunities and ensure the region enjoys sustainable economic growth and diversity into the future.

## STATISTICS

**Since the mid 1960s, the Gladstone region has grown to be the premier heavy industrial centre in Queensland. Local industry employs the majority of the population and forms the foundation for the city's future development.**

Gladstone is driven by its enormous potential as an industrial centre, which is predicted to extend from the abundance of raw materials available in the area as well as the region's high quality infrastructure. The region is rich in resources and is consequently recognised as a strategic and logical choice for industrial, commercial, retail and residential investment.

Gladstone presents countless opportunities for further economic growth and an increased need for residential living, tourism, retail and professional services, but is best recognised for the immensity of Gladstone's impressive infrastructure, all nestled relatively close together.

**01** A pair of large export coal terminals supported by inbound rail services.

**02** A large coal-fired power plant.

**03** Queensland's largest multi-commodity port which permits a wide range of shipping operations.

**04** Australia's largest cement plant with a production capacity of over 1.7 million tonnes of cement per annum.

**05** Three world-class LNG plants able to double their present capacity.

**06** Two of the largest alumina refineries in Australia and the largest aluminium smelter in Australia.

**07** Three inbound gas pipelines, serving the LNG industry.

**08** A robust services sector with proven ability to build, maintain and operate large scale manufacturing infrastructure.

**09** Ample land available for development comprising approximately 29,000 hectares (ha).

**10** A biofuels shale oil pilot plant (producing specialised hydrocarbons like diesel fuel and jet fuel).

Ongoing environmental improvements such as effluent re-use, air quality monitoring, tree re-vegetation and industry process improvements have helped the region integrate the economic and environmental concerns of the community towards a path of ecological sustainability.

Community is strong in Gladstone. Community spirited major industries have contributed significantly in the provision of academic, recreational and sporting facilities, and through involvement with the community. The Gladstone community experiences high levels of residential stability and higher than average community satisfaction with their local government compared with the rest of the state, proving Gladstone really is a liveable city, with its feet firmly in the future.

# WE'RE WORKING ON IT

## Population

62,979  
people

## Employment

92.7%

## Regional Imports

\$4.82  
billion

Gladstone Engineering Alliance (GEA) services manufacturing, engineering and service companies active in regional, national and some international markets in coal, steel, mineral processing, transportation and major resource projects.

GEA's core services to members include:

### 1. SUPPLY CHAIN OPTIMISATION

- Working with industry to identify supply gaps and opportunities;
- To build the capability and capacity to meet best practise;
- To ensure our members have full, fair and reasonable opportunity to supply goods and services.

### 2. BUSINESS DEVELOPMENT

- Keeping you up-to-date with the latest major projects and industry updates;
- Connecting you to new work opportunities;

- Sharing our knowledge of funding and opportunities to innovate, adapt and grow your business.

### 3. PROFESSIONAL SERVICES & HIGHER EDUCATION

- To develop your business and implement growth opportunities;
- Developing the skills of the local supply chain to build and maintain Gladstone industry;
- To help people in business consciously change and develop for greater success.

### 4. NETWORKING & COMMUNICATION

- Connecting you to opportunities through the facilitation of professional networks;
- To create alliances and connect businesses to each other regionally, nationally and on the global stage;
- Keeping you updated through research, legislation, industry news and information.

### 5. ADVOCATE & INFLUENCE CHANGE

- Creating a sustainable community by encouraging investment and attraction to the region;
- Promoting our members as a highly skilled supply chain;
- Representing your interests by influencing policy and decision makers through providing a single voice.

GEA WE'RE WORKING ON IT

Operated by

## Australia Pacific Liquefied Natural Gas (APLNG)

### Street Address:

84 Goondoon Street Gladstone QLD Australia 4680

**Ph:** 1300 776 205

**Email:** [aplng.gladstone@conocophillips.com](mailto:aplng.gladstone@conocophillips.com)

**Web:** [www.aplng.com.au](http://www.aplng.com.au)

Australia Pacific LNG is a joint venture between ConocoPhillips (37.5%), Origin Energy (37.5%), and Sinopec (25%) and shipped its first LNG cargo in January 2016 after nearly five years of development and construction. Australia Pacific LNG is the largest producer of natural gas sourced from coal seams in eastern Australia, supplying Australian customers with natural gas and customers in Asia with liquefied natural gas (LNG) from its Curtis Island export facility.

Australia Pacific LNG is a major supplier to Queensland's domestic gas market, supplying many Gladstone industrial customers with gas. The facility is operated by ConocoPhillips, the world's largest independent exploration and production company, based on proved reserves and production of liquids and natural gas. ConocoPhillips explores for, develops, and produces crude oil and natural gas globally. A commitment to safety, operating excellence and environmental stewardship guide our operations.

The LNG facility employs state-of-the-art engineering and environmental technology and, wherever possible, utilises local and regional resources. The facility has two processing trains, each with the nameplate production capacity of 4.5mtpa using the ConocoPhillips' Optimised Cascade Process® LNG liquefaction technology.

There are two export offtake agreements in place for the LNG - 7.6mtpa to JV partner Sinopec, and 1mtpa to Kansai Electric, both for 20 years. ConocoPhillips, along with the shareholders of Australia Pacific LNG, value a constructive and trusted relationship with their local and regional communities, landowners and stakeholders from all levels of Government. Australia Pacific LNG has invested more than \$41 million into community support programs. Community investment in long-term sustainable programs is an on-going priority for ConocoPhillips.

## Boyne Smelter Limited (BSL)

**Ph:** 07 4973 0211

**Web:** [www.boynesmelthers.com.au](http://www.boynesmelthers.com.au)

BSL is the largest aluminium smelter in Australia. BSL produces more than 570,000 tonnes of aluminium per annum.

BSL produces high quality ingot and billet. The majority of aluminium produced at the smelter is exported to South East Asia and North America and is used in engineered products for the aerospace, mass transportation, building construction, electricity transmission, wind-power generation, recreation and leisure industries.

BSL is focused on operating sustainably by ensuring the health and safety of employees, minimising environmental impacts and contributing to the local community.

During its development in the late 1970s, BSL worked with a number of government bodies to build housing, bridges, government services, a regional shopping complex and other infrastructure. The smelter continues to develop the region through its Community Investment Program and partners with a number of key non-profit organisations in the areas of education, arts, recreational activities and culture.

## Cement Australia

**ABN:** 70 009 658 520

### Street Address:

Landing Road, Fishermans Landing Gladstone QLD 4680

**Ph:** 07 4972 3017

**Web:** [www.cementaustralia.com.au](http://www.cementaustralia.com.au)

Mix it with the best!

Whether you're a customer or an employee of Cement Australia, you'll be mixing with the very best.

An icon of the Australian cement industry, we are the nation's leading supplier of cementitious materials and have an unmatched depth of experience in Australian construction.

Our team of talented people supply major concrete producers, building and engineering contractors, leading retail building suppliers and some of the nation's largest mines.

We offer the market a broad range of competitive products and services – from bulk and packaged cementitious materials to alternative fuels and waste management.

Our local manufacturing plant produces consistently high performance Portland and blended cements to meet both general and special purpose construction requirements.

Sustainable and performance enhancing supplementary cementitious materials, including high grade fly ashes and slag are also supplied.

With the largest dedicated distribution network and storage facilities across the country, our customers can depend on us to deliver.

## Gladstone Area Water Board (GAWB)

**Ph:** 07 4976 3000

**Web:** [www.gawb.qld.gov.au](http://www.gawb.qld.gov.au)

**Email:** [gawb@gawb.qld.gov.au](mailto:gawb@gawb.qld.gov.au)

The Gladstone Area Water Board (GAWB) is a State Government owned organisation that owns and operates Awoonga Dam on the Boyne River, the fourth largest water storage in Queensland. GAWB is responsible for ensuring the long and short-term water needs of current and future customers are met in ways that are environmentally, socially and commercially sustainable.

GAWB is the sole supplier of raw water to major industrial sites in the Gladstone region and supplies treated drinking water to Gladstone Regional Council for distribution to homes and businesses. GAWB supplies about 100 mega litres of water to Gladstone each day, 70% of which is supplied directly to industry as raw water.

In addition to the dam itself and a network of water delivery pipelines and water treatment plants, GAWB also owns and manages all the recreational facilities at Lake Awoonga, including picnic shelters, BBQ facilities, walking trails, playgrounds and boat ramps. GAWB also owns and operates a Fish Hatchery, where Barramundi, Mangrove Jack and Sea Mullet are bred to restock Lake Awoonga each year.

## Gladstone Ports Corporation (GPC)

**Ph:** 07 4976 1333

**Web:** [www.gpcl.com.au](http://www.gpcl.com.au)

Port of Gladstone - Port of Bundaberg - Port of Rockhampton - Gladstone Marina

Gladstone Ports Corporation (GPC) are a Company Government Owned Corporation (GOC), responsible for the import of raw material and the export of finished product associated with major industries in the Central Queensland region.

GPC manage and operate three port precincts including the Port of Gladstone, Port of Bundaberg and Port of Rockhampton.

In consultation with the community, industry and government, GPC undertake a strategic approach to planning, setting the vision and direction for all three ports for the short and long term.

In addition to the three port precincts GPC has two subsidiaries, the Gladstone Marina and the Gladstone Marine Pilot Service.

GPC are committed to growth, prosperity and the community, carrying out our operations in an effective, efficient and environmentally responsible manner.

GPC has been a vital part of the Gladstone community for over a century.

## Gladstone Power Station (NRG)

**Ph:** 07 4976 5211

**Web:** [www.nrggos.com.au](http://www.nrggos.com.au)

The Gladstone Power Station is a world-class facility providing customers with safe, reliable, low-cost electricity.

Gladstone Power Station was built by the Queensland Government and first commenced operation in 1976. The station has been a significant part of the Gladstone community and an important energy provider for Queensland since that time. The Gladstone Power Station is still Queensland's largest single power station and remains an important generating facility in the National Electricity Market.

Our people at Gladstone Power Station contribute an amazing amount of knowledge, experience and drive that has allowed this station to operate well during the past 35 plus years. Gladstone Power Station continues to play a vital role in the growth of the Gladstone region.

## Orica

**Ph:** 07 4976 3500

**Web:** [www.orica.com](http://www.orica.com)

An Australian mining services company with global operations, Orica has a diverse workforce of over 12,000 people servicing customers across more than 100 countries. Orica is focused on developing long term partnerships that reduce total cost of mining, improve productivity and enhance our customers' licence to operate.

Orica is the largest provider of commercial explosives and blasting systems to the mining, quarrying, oil and gas and construction markets, a global leader in the provision of ground support in mining and tunnelling, and a leading supplier of sodium cyanide for gold extraction.

Orica's Yarwun manufacturing facility includes three nitric acid plants, two ammonium nitrate plants, an ammonium nitrate emulsion plant and a sodium cyanide plant, and maintains a strong commitment to both the local Gladstone community and its over 180 employees.

**QUEENSLAND ALUMINA  
LIMITED**

## QAL

**Ph:** 07 4976 2211

**Web:** [www.qal.com.au](http://www.qal.com.au)

For more than 50 years, Queensland Alumina Limited has one of the world's leaders in alumina production. Our product is supplied to customers on a global scale.

QAL is committed to achieving the highest standard of environmental performance. Environmental management is integrated into all aspects of our business.

QAL strives to be the region's employer of choice. We recognise our employees are vital to our long term success and are our most valuable asset.

In partnership with Rio Tinto, we aim to give back to the Gladstone region and community. Find out how we can help you via our [Here for Gladstone](#) website.

## Queensland Energy Resources (QER)

**Ph:** 07 4971 1200

**Web:** [www.qer.com.au](http://www.qer.com.au)

QER is an Australian company headquartered in Brisbane, with a New Fuels Development Centre located near Gladstone.

The company was formed to help tackle Australia's growing reliance on imported transport fuel. For example, 85% of the diesel used to run our farms and mines, bring in tourists and stock our supermarket shelves is currently derived from overseas sources. New, Australian sources of high quality transport fuel are needed to help reduce this dependence.

QER has tenements and a sustainable technology to develop Queensland's largest kerogen shale reserves (also known as oil shale), containing some 18 billion barrels.

The company has successfully operated a demonstration plant at its Gladstone site, producing ultra low sulphur transport fuels – mainly diesel and jet fuel, which were proven to meet retail fuel standards through a comprehensive program of testing and trials. The operation was thoroughly reviewed by Queensland's department of Environment and Heritage protection and found to meet and better all of the high environmental standards required under its licence.

Following the successful completion of the trials, QER has plans for a commercial new fuels facility to be located on the Stuart oil shale resource at its Gladstone site, with a capacity to produce around 8,000 to 12,000 barrels a day of finished fuels, mainly ultra-low sulphur diesel. Such a project would form the core of a new industry with the potential to create many hundreds of jobs.

# Rio Tinto

## Rio Tinto Yarwun

**Ph:** 1800 226 258

**Web:** [www.riotinto.com](http://www.riotinto.com)

Our world class Yarwun alumina refinery is situated ten kilometres north-west of Gladstone in central Queensland. Construction began in 2002 and the first shipment of alumina was made in late 2004. The refinery was the first greenfield refinery to be built in the western world in 20 years.

An aluminium ore known as bauxite is transported from Rio Tinto Aluminium's mining operations in Weipa on Western Cape York to be processed into alumina at the Yarwun refinery, which is 100 per cent owned and operated by Rio Tinto Aluminium. Recent expansions have more than doubled production at the Yarwun refinery to 3.4 million tonnes of alumina per year, making Rio Tinto Aluminium one of the world's leading alumina producers.

Yarwun's alumina is shipped to customers in Australia and overseas, including the Middle East.

### Refining

Refining alumina (aluminium oxide) is the second step in the production of aluminium.

Alumina is refined from bauxite using a chemical process known as the Bayer Process. Invented in 1888 by German scientist Karl Bayer, this process has four stages.

#### 1. Digestion

Bauxite is finely ground in mills and then mixed with a hot, caustic soda solution which dissolves the alumina contained in the bauxite.

#### 2. Clarification

The solution of alumina and caustic soda passes into rows of thickener tanks, where the solid impurities sink to the bottom as a fine red mud. The red mud (or bauxite residue) is a by-product of the process. It is washed several times with water, neutralised, and then stored at the residue management area. The clear solution is sent to the precipitation stage for the alumina to be recovered.

#### 3. Precipitation

Alumina trihydrate is added to the alumina solution in a line of precipitation tanks to seed the formation of additional alumina trihydrate crystals.

#### 4. Calcination

The alumina trihydrate crystals are washed, filtered and then heated in gas-fired kilns at temperatures greater than 1,100°C to remove water molecules, creating a fine white powder known as alumina.

## Santos GLNG

**Ph:** 1800 761 113

**Web:** [www.santos.com](http://www.santos.com)

Santos GLNG is a pioneering venture producing natural gas from Queensland's coal seams, to be converted into liquefied natural gas (LNG) for sale to world markets.

It involves ongoing gas field development in the Surat and Bowen Basins, a 420-kilometre gas transmission pipeline, and an LNG plant on Curtis Island, near Gladstone.

Santos GLNG is led by Australian company Santos, in partnership with three of the world's leading energy companies – PETRONAS from Malaysia, Total from France, and KOGAS from South Korea.

Santos GLNG will be operating in the Gladstone region for decades to come and is proud to be a long-term member of such a great community.

## Shell's QGC Business

**Ph:** 07 4971 6600

**Web:** [www.shell.com.au](http://www.shell.com.au)

Shell QGC is a Shell-owned business and the world's first producer of LNG from natural gas sourced from coal seams. QGC has its headquarters in Brisbane, Queensland. QGC is one of Australia's leading natural gas explorers and producers, focused on developing Queensland's world-class gas reserves for supply to the domestic market and international customers. QGC operates a two-train LNG facility on Curtis Island, near Gladstone. The project loaded its 100th cargo in February 2016.

### Employment:

Our peak construction workforce was 14,500. Our workforce has naturally declined as construction has been completed, but we are retaining a long-term operations team in Gladstone. Recruitment for that workforce has been completed and we are very proud that 98% of our 300 QGC direct employees and contractors are locals.

### Current status:

In December 2014, QGC became the first operation in the world to produce LNG from natural gas sourced from coal seams. The facility loaded its 100th cargo in February 2016. Looking ahead, QGC is focused on continuing safe and reliable operations.

### Estimated production:

The plant is expected to reach plateau production of approximately 8 million tonnes of LNG per annum in 2016.

## Southern Oil Refinery

**Ph:** 07 4975 2666

**Web:** [www.sor.com.au](http://www.sor.com.au)

Southern Oil is a private, 100% Australian owned company, based in Wagga Wagga, NSW, which has been re-refining waste oil since 2001. Southern Oil's Wagga Wagga plant and Northern Oil Refinery at Gladstone are the only facilities in Australia producing fully re-refined lube oil accredited for use by a major international oil company for global applications.

The Northern Oil Refinery at Yarwun, near Gladstone, is the only facility in Queensland capable of recycling waste lube oil back into base lube oil and is the most advanced re-refining plant of its kind in the world. It can re-refine up to 100 million litres of waste lube oil a year, meaning 100 per cent of Queensland's annual waste lube oil production can be processed through Gladstone, underwriting a new industry and local jobs and provides a long term, environmentally sustainable waste oil recycling option for truck fleets, heavy vehicle operators, mines and local governments.

## Gladstone Regional Council

**Ph:** 07 4970 0700

**Web:** [www.gladstone.qld.gov.au](http://www.gladstone.qld.gov.au)

Gladstone Regional Council is located in Central Queensland, about 550 kilometres north of Brisbane, bounded by the Coral Sea to the east with easy access to a national highway, rail network and award-winning airport.

The region is a rapidly growing hotspot, home to 60,000 people, and boasts national parks, state forests, beaches, islands and is the doorway to the Great Barrier Reef. Gladstone is a prosperous region built on major industry, including two of the world's largest alumina refineries, an aluminium smelter, power station, cement and chemical manufacturers and Queensland's largest multi-commodity port. In addition, the Gladstone State Development Area continues to attract large industry to the region, including the current construction of three Liquefied Natural Gas (LNG) plants on Curtis Island, a short distance off the coast of Gladstone, with approval for a fourth.

With a permanent workforce of around 750, servicing over 200 different business functions, Council employees strive to do the every day things well, every day, and maintain the standard of our current environment amid the impacts of rapid growth and development.

## Queensland Resources Council

**Ph:** 07 3295 9560

**Web:** [www.qrc.org.au](http://www.qrc.org.au)

The Queensland Resources Council is a not-for-profit peak industry association representing the commercial developers of Queensland's minerals and energy resources. QRC works to secure an environment conducive to the long-term sustainability of minerals and energy sectors in Queensland. In close collaboration with member companies, kindred organisations, regional partners and key stakeholders, the QRC works to achieve positive outcomes for QRC members.

### QRC aims to be:

- Exemplary: a leading corporate citizen, ethical and responsive in all dealings with members, our people and stakeholders;
- Representative: effective in providing representation across the entire Queensland minerals and energy sector;
- Influential: respected by, and influential with governments, the community and the media, reflecting the quality of our policy advice and analysis;
- Strategic: focused on strategies to secure long-term sustainability of the minerals and energy sector;
- Leading: recognised widely for our leadership role b resource sector stakeholders;
- Trusted: carries a high degree of confidence and expectation from our stakeholders.

# SUPPORT SERVICES – Gladstone Region

## Gladstone Area Promotion and Development Limited

**ABN:** 67 010 613 831

**Street Address:**

GAPDL Business and Information Centre,  
72 Bryan Jordan Drive Gladstone QLD 4680

**Ph:** (07) 4972 4000

**Email:** gapdl@gapdl.com.au

**Web:** www.gapdl.com.au

Gladstone Area Promotion and Development Ltd (GAPDL) is a not-for-profit, membership based organisation that was originally founded in 1983.

Today, more than 30 years on, GAPDL is a dynamic and enthusiastic organisation, and our vision is to advance the Gladstone region through the promotion and development of business, industry and tourism for the benefit of our members and the community.

More than an economic growth partner, GAPDL operates and manages a mobile information centre which is a first for Queensland.

We also oversee the accreditation of the Biloela and Rural Hinterland Visitor Information Centres.

As the Gladstone region's lead development, business, tourism and community development organisation, we have strong professional partnerships with Gladstone Regional Council, Australian and Queensland Governments, Tourism and Events Queensland, Queensland Tourism Industry Council, along with community organisations and major industry.

Our partnerships sit at the heart of the region's dynamic business, tourism and community growth and development.

## Gladstone Chamber of Commerce and Industry Inc.

**ABN:** 16 002 557 482

**Ph:** (07) 4978 7800

**Email:** mail@gcci.com.au

**Web:** www.gcci.com.au

GCCI has successfully represented the interests of the Gladstone & Districts business community since 1896. Over the last two years, the Chamber has been managed by a dedicated and consistent group of representatives from a range of local businesses.

The Gladstone Chamber of Commerce and Industry Inc. are committed to supporting small and medium business in the Gladstone Region to reach their potential, building business and economic prosperity for the Region.

The Gladstone Chamber of Commerce & Industry Inc. is an incorporated association funded through partnerships; a strong membership base; and business development activities. GCCI works closely with the Gladstone Regional Council, GAPDL, GEA, Industry organisations, local businesses and other organisations to maximise business opportunities and economic prosperity in the Gladstone Region.

## Department of State Development

**ABN:** 29 230 178 530

**Street Address:**

Level 1, 20-22 Herbert Street,  
Gladstone Queensland 4680

**Ph:** 07 4977 7400

**Email:** busassist.gladstone@dssd.qld.gov.au

**Web:** www.statedevelopment.qld.gov.au

Queensland's economy is Australia's strongest and most diverse.

The Department of State Development's mission is to lead the delivery of economic development outcomes for Queensland.

Our strategic objectives are to:

- Influence policy and the investment environment
- Facilitate a major projects pipeline
- Strengthen the regions
- Grow priority, new and emerging industries
- Support enterprise and job creation

Our focus areas are:

- Industry - Prioritise industries and new sectors to encourage growth and innovation
- Regions - Grow regional economies through investment, exports and job creation
- Projects - Respond to challenges and opportunities and identify actions that will grow new projects

# SUPPORT INDUSTRIES – Queensland

## Central Highlands Development Corporation

**ABN:** 71 646 394 481

**Street Address:**

31 Ruby St Emerald QLD 4720

**Ph:** 07 4982 4386

**Email:** [enquiries@chdc.com.au](mailto:enquiries@chdc.com.au)

**Web:** [www.chdc.com.au](http://www.chdc.com.au)

We actively partner with industry experts, businesses, government and communities to drive growth, enable innovation, build capability and deliver economic outcomes.

Central Highlands Development Corporation (CHDC) is a not for profit organisation and the lead economic and tourism development agency for the Central Highlands region of Queensland, Australia. Our region includes the communities of Arcadia Valley, Bauhinia, Blackwater, Bluff, Capella, Comet, Dingo, Duaringa, Emerald, Rolleston, Sapphire Gemfields, Springsure and Tieri.

Underpinned by robust and innovative industries including resources, mining, agriculture, tourism, small business and start-ups, we advocate for sustainable regional and economic growth by enhancing our workforces, promoting our region and supporting our businesses.

Over 20 years, our rich understanding of the local industry has allowed us to deliver economic insights and strategic action plans for the region. In turn, this has contributed to building strong, capable businesses and industries that are supply-chain ready and optimised for expansion.

As an organisation, we are dedicated to:

- Advocating for sustainable regional and economic growth
- Proactively marketing and promoting the Central Highlands as a 'region of choice'
- Enhancing workforce development
- Supporting business development, innovation and capacity
- Supporting community organisations to develop skills and knowledge

We offer a range of opportunities for all who wish to partner with our organisation's projects. To discuss partnership opportunities contact CHDC.

## Toowoomba and Surat Basin Enterprise

**ABN:** 85 155 004 523

**Street Address:**

6 Ann St Toowoomba QLD 4350

**Ph:** (07) 4639 4600

**Email:** [info@tsbe.com.au](mailto:info@tsbe.com.au)

**Web:** [www.tsbe.com.au](http://www.tsbe.com.au)

Toowoomba and Surat Basin Enterprise (TSBE) is an independent, business-driven organisation linking companies with opportunities to achieve sustainable growth and diversity for the region.

We're committed to ensuring our local business community will innovate, adapt and prosper.

We take pride in encouraging major investment, and promoting the vital need for new and upgraded infrastructure in our region.

## Resource Industry Network

**Street Address:**

153 Boundary Road, Ooralea, Mackay Qld

**Ph:** (07) 4952 4184

**Email:**

[admin@resourceindustrynetwork.org.au](mailto:admin@resourceindustrynetwork.org.au)

**Web:** [www.resourceindustrynetwork.org.au](http://www.resourceindustrynetwork.org.au)

Resource Industry Network is a peak industry association representing companies actively engaged in the resource sector and those who are allied to the sector.

We connect, develop and promote our members to the commercial decision makers, peak bodies and government representatives in the resource sector.

**Our Vision**

To be the leading resource sector member group.

**Our Values**

Facilitate effective member-to-member connections  
Assist in developing regional capability e.g. education and innovation  
Promote the innovation and capability of our members and industry

**Our History**

Established in late 2000, Mackay Area Industry Network (MAIN) was formed by a group of like-minded business people, for the need of a common voice for industry.

Looking towards the future, the cooperative undertook a review of what the business does and how it serves its members to identify key areas of growth and expansion.

As a result, in July 2014 MAIN rebranded to Resource Industry Network, commencing an exciting new chapter for the business. The new name creates a new look, new direction and opens up new opportunities for the business and its members.

4PS SOFTWARE

A&M Slashing

Achieve

the right people for the job

## 4PS Software

**ABN:** 45 110 705 443

**Ph:** +61 7 4944 1272

**Email:** mick.storch@thebulliongroup.com.au

**Web:** www.thebulliongroup.com.au

4PS Software is a web-based software designed to manage the four P's of your business - people, plant, process and procedures.

The system has been developed to track the day to day requirements of running either a small- or large-sized business.

It keeps both you and your employees up to date in real time about any aspect of your business that requires monitoring and management and is especially valuable as a tool for project management.

Take the manual and tedious aspect of rummaging through paper files out and experience the time-saving benefits of using 4PS to organise your business like neverbefore.

Our easy to use and set up system will help you keep track of employees and equipment, and serve as a central repository for storing and updating your processes and procedures.

Using 4PS, your business' information is accessible from anywhere with internet access.

You can be assured your information is always up-to-date and kept in one central location. There is no need to refer to others to find and monitor key pieces of information; such as the expiration of fleet vehicle lease renewals, the location of standard report templates, identify gaps; in certifications, and all aspects of running your business.

## A and M Slashing

**ABN:** 50 192 638 942

**Street Address:**

213 Alf O'Rourke Drive  
Gladstone Queensland 4680

## ALE Heavylift (Australia) Pty Ltd

**ABN:** 80 131 060 074

**Street Address:**

45 Mclachlan Street (Ground Floor)  
Fortitude Valley Queensland 4006

**Ph:** +61 7 3339 1319

**Email:** [accounts.aus@ale-heavylift.com](mailto:accounts.aus@ale-heavylift.com)

**Web:** [www.ale-heavylift.com](http://www.ale-heavylift.com)

Aerial Media Gladstone performs aerial inspections for asset integrity and management purposes.

Previously these inspections required equipment shutdowns or exposing people to risks associated with working at heights, cranes, confined spaces, power transmission or exclusion zones.

We eliminate that risk by using state of the art drones to access these assets during normal operation to record high resolution imagery while maintaining safe distances from personnel and equipment.

Results are uploaded to a cloud-based inspection portal for review anywhere in the world.

Our incident free history is a testament to our strict risk management methodology.

Aestec Services specialise in the provision of building, plumbing, civil and fabrication services. Within these business areas, Aestec offers expertise in construction, maintenance, earthmoving, plumbing and gas fitting, sheet metal and insulation, and concreting. Located in Gladstone, the Company provides services to major clients in the region including Boyne Smelters Limited, Cement Australia Pty Limited, Gladstone Area Water Board, Orica Limited, Rio Tinto Alcan Yarwun Pty Ltd, Gladstone Ports Corporation Limited and Queensland Alumina Limited.

Aestec have completed high profile and complex projects including the South Gladstone Reservoir roof structure replacement, new state of the art laboratory building at Cement Australia, Bechtel Warehouse, new hot metal laydown yard for Boyne Smelters, and numerous other large projects for industrial companies.

Aestec have developed a highly qualified team diverse enough to take on any challenge. Aestec Services completed the reconstruction of the South Gladstone potable water reservoir roof structure which was completely replaced whilst remaining in full service and have also constructed a 9000m<sup>2</sup> car park for RioTinto Alcan installing substrate to 98% relative dry density, completed with a 2 coat seal.

With our vast site experience, reliable safety systems and incredible resource capability, our clients feel confident Aestec can complete the most complex maintenance projects whilst working in with site production requirements.

Aestec have completed many small to very large and very complex concreting works. Our professional team of concreters, steel fixers and form setters make the task look easy. Years of experience gained from working on these logistical complex projects has forged these tradesmen into a capable, diverse team of experts.

Working within a range of industries such as oil and gas, mining and offshore, the services ALE Heavylift Australia offer include: skidding, jacking, lifting, transporting, loading-in, loading-out, weighing, ballasting, marine engineering, project management and much more.

Combining exceptional project management with engineering intelligence, ALE offers worldwide heavy transportation and lifting services to all industry sectors.

The company was founded in 1983 and has expanded steadily through a balanced strategy of organic growth and acquiring key companies whose experience enhances our specialist capabilities.

We're one of the world's major international heavy transport and installation contractors with a global network of operating centres and a large fleet of heavy cranes, specialist transport and installation equipment.

As a complete solution provider for lifting, installing, ballasting, jacking and weighing large heavy loads, organisations all over the world turn to us to push the boundaries of what's possible with their high profile projects.

Investment in technology, systems and equipment ensures we stay ahead.

For example, our dedicated R&D facility is responsible for the Innovation Series, including equipment such as the AL.SK crane fleet and the Mega Jack system.

By investing as much in our people as we do in equipment, we have a world-class management structure to support our technical potential.

So as well as having the best project managers and engineers available today, we'll have the best tomorrow too. By achieving maximum value from our next-generation equipment, we can effectively meet your requirements.

**Web:** www.ampcontrolgroup.com/

Alpha Concepts is a company that provides practical, effective solutions to industrial process engineering and environmental problems. We aim to be flexible, cost effective, professional and prompt in the delivery of our services.

Alpha Concepts is an environmental engineering consulting company, specialising in water and wastewater treatment, and industrial manufacturing solutions.

Based in Gladstone, we service clients across regional Queensland and throughout Australia.

We utilise our process engineering know-how and experience in the water and wastewater sector to design custom treatment systems to meet site-specific needs.

We have the skills and experience to progress projects from the design phase through construction and implementation, to decommissioning.

We offer services in the following areas:

- Treatment systems & manufacturing technology;
- Design, supply and maintenance of septic and wastewater treatment systems;
- Sale of cyanide wastewater treatment technology;
- Sale of hydrogen cyanide and sodium cyanide manufacturing technology;
- Consulting services;
- Process and chemical engineering consultation;
- Environmental engineering consultation;
- Process project management;
- Process engineering design;
- Development of technical training resources;
- Provision of technical training;
- Compliance and auditing;
- Development approvals, compliance and auditing;
- MEDLI analysis for application of treated water to land.

ALS is recognised globally for expertise in coal testing, resource analysis, and product evaluation programs.

Our service includes the sampling, preparation, and analysis of coal and coal-products provided in coalfield locations, on mine sites and at regional speciality hub laboratories.

As one of the world's largest and most diversified testing services providers, we have sites strategically located around the world to provide accurate and timely services.

Amcontrol delivers integrated electrical, electronic and control solutions to improve safety and efficiency in mining, renewable, infrastructure and industrial applications.

We operate a highly integrated model that delivers high value solutions and services that help support optimum operational performance, safety and efficiency.

Drawing on extensive engineering and manufacturing capabilities, our customers are able to leverage a sophisticated internal network of products, capabilities and service support all via one single source.

From the custom design, manufacture and delivery of high voltage power distribution equipment such as substations and switchrooms through to fit for purpose applications engineering and field service support, we pride ourselves on this unique approach that puts safety and solving customer problems at the very core of what they do.

We understand the operational challenges faced by our customers which is why we have some of the most experienced technical staff in their fields working across our global operations to ensure we can solve these challenges with a technology driven solution.

Andersons Auto City's success comes from the range of skills, knowledge and automotive experience provided by local people working together.

Our friendly and experienced local team are here to help you find exactly what you're looking for and will assist you every step of the way.

A family owned and operated dealership we are proud to have contributed to the areas of employment and business growth in our community.

At our Gladstone car dealership, we are Mazda, Mitsubishi, and Holden specialists.

It's important to our team that our customers drive away from our Gladstone dealership in a car suited to their needs, budget and lifestyle.

In addition to stocking a range of new and used cars for sale, we also offer a selection of finance and insurance options, as well as car servicing and parts.

Anembo Consultants is a multi-project award winning landscape architectural consultancy with expertise in delivering landscape design and contract administration to projects in Gladstone, Mackay, Rockhampton, Chinchilla, Emerald, Blackwater & Agnes Waters.

From its inception team Anembo has focused on the total project process from environmental assessments and urban planning through to landscape design and construction management.

Our experience and industry network ensures rapid response solutions and expert navigation of development applications through the labyrinthine planning and political processes.

Each of us at team Anembo has over 20 years' experience. Our personal skills and knowledge base is recognised by our clients, to whom Anembo has become the supplier of choice to high-profile and complex projects. Built upon a foundation of integrity and teamwork, Anembo will deliver innovative solutions and excellence to your development team.

Our tight knit group of friendly and experienced professionals pride themselves on the delivery of excellent advice, on time and on budget.

Aurecon provides engineering, management and specialist technical services for public and private sector clients globally.

Through our strong links with energy/power, mining, processing, aluminium, petrochemical, cement, ports, infrastructure, transport, environment, community and water, we have developed a keen appreciation of the need to incorporate qualities and features in projects that improve safety and asset management, that assist in reducing the cost of operating and maintaining a facility through its whole life.

The Gladstone office's approach is to support and create a local One Stop Shop, particularly for operational engineering services.

Our suite of multi-discipline professional services can provide clients with skills and capability from project concept design right through to project management of construction and commissioning.

Aurecon's strength lies in the depth of experience of its personnel, combined with our tried and proven approach, quality systems and technical resources maintaining tight controls over all aspects of the work.

Bellis Australia was founded in 1971 and is one of the longest running Industrial Service Contractors in Australia.

The company Specialises in the Manufacture, Supply and or Installation of complete systems for The Oil, Gas, LNG, Resource Processing Industries, Power and General Industries throughout. The company policy is to expand through Technical Innovation and Technical Associations with Industry Specialists around the world to provide a Safe, Reliable and Dependable on time Service to Clients both in Australia and Overseas.

Our objective is to deliver the best industry practice to our clients by ensuring that there is an enhanced safety culture within our multi skilled work group for:

- Insulation Services
- Scaffolding
- Blasting & Painting
- Sheetmetal Fabrication
- Rope Access
- Industrial Cleaning
- Crew Hire
- Corrosion Control
- Material & Tool Supply
- Protective Coating
- Fire Proofing
- Heat Tracing

Berg are a proud Queensland engineering business that has built a reputation for excellence on the back of two generations and more than four decades of Berg family passion.

Headquartered in Brisbane and with bases in the Asia Pacific we strive to provide our clients with intelligent asset lifecycle management solutions that reduce operating costs, maximise performance, extend asset life, all the while ensuring we meet our ISO accredited quality, environmental and safety standards.

We have amassed considerable expertise providing our clients with high-risk, critical parts. In particular, we have developed a strong reputation for maintaining and managing fleets of rotatable assets such as pumps, valves and gearboxes.

We achieve our best results when working in partnership with our clients to explore and fully understand the challenges at hand, before designing and implementing a tailored solution.

Having been a local business for more than four decades, we have evolved, matured and diversified in tandem with our clients and today work with a wide range of blue chip businesses across the Asia Pacific region.

Our reputation for on time and on budget delivery is what sets us apart from our competitors and with our industry leading facilities in our Brisbane, Gladstone and New Caledonia workshops, we can comfortably deliver contracts up to \$15 million in value.

Our workshop capabilities include:

- Fabrication & installation of complex items and functional structures;
- Lifting & manipulation equipment - hard stand areas and overhead cranes with 20 tonne lifting capacities;
- Large capacity machining - we have over \$20 million invested in modern computer-controlled machinery and expert fitting capabilities, enabling us to provide an extensive range of products and build a reputation for specialising in large, complex and difficult to source items and components;
- Welding - we have significant in-house welding capabilities including exotic material welding and plasma transferred arc facing technology.

We cover the full spectrum from shielding and fuel gases for welding through rare gases to calibration gas mixtures and high-purity gases.

You can also rely on us for packaged chemicals and a wide range of refrigerant gases.

All of these are available in sizes, purities and pressures to suit the needs of every business from the sole trader to the large enterprise, scaling from low-volume cylinders through high-capacity tanks to customisable on-site supply systems.

Our BOC equipment range includes gas equipment, welding machines and kits, and a broad selection of accessories and options.

When you invest in BOC equipment, you're making an investment in your future.

Brand Industrial Services is a leading provider of specialty services to the global market.

Its extensive portfolio of specialized industrial service offerings include scaffolding, blast & paint/industrial coatings, insulation/lagging, cathodic protection and other related crafts.

Brand operates in five keymarket segments -upstream/midstream, downstream, power generation, industrial and infrastructure.

With a deep-rooted history in the resources industry, Broadspectrum has delivered asset management services for more than half a century across the oil and gas, mining and industrial sectors.

We leverage our collective expertise to maximise return on investment for our clients - bringing safe, cost effective, efficient, innovative and sustainable solutions.

Our difference is the value we create by the true collaboration we bring to bear through our in-house delivery capability, tailored to the needs of our oil & gas, mining and industrial customers.

Broadspectrum and its subsidiaries delivers operations, maintenance, shutdown, construction, drilling and well servicing, camps, logistics and engineering design services.

Brolga Cranes and Equipment are an Indigenous owned company.

We consider ourselves to be proactive in providing modern cranes, equipment and personnel and we are truly focused on an Indigenous and equal opportunity work force.

We are able to provide qualified crew for large crane erecting and demobilisation of cranes, with our crew having a high level of experience in moving cranes up to 750T capacities. We are able to assist with the rigging requirements from our professional crews for any rigging activities within our fields.

### OUR CAPABILITIES

Brolga Cranes is a newly established crane operation company offering professional crane lifting service with specialist experience in:

- Construction
- Maintenance
- Shut Downs
- Marine
- Renewable Energies (Windfarms)
- Oil and Gas
- Government Projects

With our safety implementations in place for safe controlled work activities, our tools involve:

- Work Method Statement
- Job Safety Analysis
- Daily Equipment Log Books
- Lift Studies
- Project Pre-Start Talks & Checks

Brolga Cranes and Equipment and our Support Teams are committed to ensuring a safe and profitable outcome for everyone.

Cape is an international leader in the provision of critical industrial services principally to the energy and natural resources sectors.

Our multi-disciplinary service offers the traditional services of access, insulation, coatings and mechanical, and a range of specialist services including oil and gas storage tanks, heat exchanger replacement and refurbishment, and environmental services.

Cape's 16,400 people deliver safe, reliable and intelligent solutions both on and offshore.

International coverage extends across the UK, Europe & CIS, Middle East & North Africa and Asia Pacific.

Cardno is a professional infrastructure and environmental services company, with expertise in the development and improvement of physical and social infrastructure for communities around the world.

Cardno's team includes leading professionals who plan, design, manage and deliver sustainable projects and community programs.

Cardno is an international company listed on the Australian Securities Exchange (ASX: CDD).

Mix it with the best!

Whether you're a customer or an employee of Cement Australia, you'll be mixing with the very best.

An icon of the Australian cement industry, we are the nation's leading supplier of cementitious materials and have an unmatched depth of experience in Australian construction.

Our team of talented people supply major concrete producers, building and engineering contractors, leading retail building suppliers and some of the nation's largest mines.

We offer the market a broad range of competitive products and services – from bulk and packaged cementitious materials to alternative fuels and waste management.

Our local manufacturing plant produces consistently high performance Portland and blended cements to meet both general and special purpose construction requirements.

Sustainable and performance enhancing supplementary cementitious materials, including high grade fly ashes and slag are also supplied.

With the largest dedicated distribution network and storage facilities across the country, our customers can depend on us to deliver.

Central Apartment Group is an organisation that specialises in the management and operation of apartment hotels across Australia.

Our philosophy is to create a "home away from home" service for the mining sector in regional and capital cities.

Our focus is on providing quality accommodation and personalised service in superior locations.

This philosophy gives our clients assurance their most important asset, "their people", are looked after.

We are a 4.5 star hotel group with 17 hotels ranging from full service to apartment hotels located in 12 destinations offering over 1,000 rooms and apartments.

We pride ourselves on serving the coal, steel, mineral processing and transport sectors Australia-wide.

As a result of this client base we have extensive experience in catering for client's specific projects including shutdown work and can provide all meals daily.

With access to a full range of amenities and services we have been able to tailor packages for a variety of locations for clients such as Conoco Philips, BHP, Rio Tinto, Bechtel, Aurizon, Shell, Gladstone Port Authority, Gladstone City Council, and both state and federal governments.

Festo is a worldwide leading manufacturer and supplier of pneumatic, electrical, motion control & process automation products & solutions.

We supply to all industries including the manufacturing, mining, water and mineral processing sectors.

We hold stock locally in Gladstone and are available to visit your plant to assist you 24/7.

Our range includes:

- Pneumatic & electric cylinders
- Full range of solenoid control valves
- Valve terminals
- Positioners (4-20mA), rotary & linear
- Full range of push in fittings & air tubing
- Air filters, regulators & lubricators
- Electric positioning systems
- Rotary actuators (pneumatic) - 90 & 180 degree
- Angle seat valves
- Butterfly valves
- Knifegate valves
- Ball valves
- Namur valves
- Sensor boxes
- Control cabinets built to your specification

CMBM Facility Services is an Australian owned company that has been operating throughout Queensland since 2005.

We provide expert cleaning, project management, building services, asset maintenance, grounds and facilities management services to a range of industries across the state.

We also provide a dedicated Operations Manager to quality control our services, all supported by an innovative IT platform for work scheduling and live job updates.

We have a deep understanding of the service industry with a total commitment to client satisfaction.

We provide our clients with a single point of contact solution and apply leading-edge technologies and management systems to provide transparency, accountability, trust and value for money.

Cleanaway Waste Management Limited is Australia's leading total waste management, industrial and environmental services company. We have supported Australian businesses for over 50 years, delivering solutions that offer extraordinary benefits not only for our customers, but also for our communities. In 2018 we welcomed Toxfree and Daniels Health into the Cleanaway family, increasing our reach and scale to over 6,000 expert staff and a fleet of almost 4,500 specialist vehicles across more than 260 locations around Australia. We are Australia's largest waste, recycling, industrial and liquids service provider with a substantial network of state-of-the-art facilities, transfer stations, engineered landfills, liquid treatment plants and refineries.

At Cleanaway, we offer our customers an unrivalled capacity to collect, process, treat, recycle or safely dispose of any type of waste. Because we see all waste as a resource, managing Australia's waste needs isn't a matter of asking "where does it go now?", but "what can it be next?" Our experience and expertise in the industry means we're always finding better, smarter and cleaner ways to make a sustainable future possible.

Here at CMD, we offer asbestos removal for smaller domestic jobs to large-scale industrial projects.

We complete the entire process - from lodging your paperwork to disposing of the asbestos once removed.

Your health and safety is our first priority.

We are fully licensed in the removal, transportation and disposal of this hazardous material.

We also offer mild steel, stainless steel, and aluminum fabrication.

We take pride in our high quality domestic and industrial fabrication work.

We offer fabrication and welding on smaller projects such as gates to large industrial platforms and stairwells.

Our welding services cover general welding to structural welding in both stainless steel and aluminum.

From our workshop to site, we take pride in our welding and delivering to you the highest standards and value for your money.

We know our business is built on its reputation and that is why every job is carefully checked to ensure adherence to our stringent quality standards.

Australia Pacific LNG is a joint venture between ConocoPhillips (37.5%), Origin Energy (37.5%), and Sinopec (25%) and shipped its first LNG cargo in January 2016 after nearly five years of development and construction.

Australia Pacific LNG is the largest producer of natural gas sourced from coal seams in eastern Australia, supplying Australian customers with natural gas and customers in Asia with liquefied natural gas (LNG) from its Curtis Island export facility.

Australia Pacific LNG is a major supplier to Queensland's domestic gas market, supplying many Gladstone industrial customers with gas. The facility is operated by ConocoPhillips, the world's largest independent exploration and production company, based on proved reserves and production of liquids and natural gas.

ConocoPhillips explores for, develops, and produces crude oil and natural gas globally.

A commitment to safety, operating excellence and environmental stewardship guide our operations. The LNG facility employs state-of-the-art engineering and environmental technology and, wherever possible, utilises local and regional resources. The facility has two processing trains, each with the nameplate production capacity of 4.5mtpa using the ConocoPhillips' Optimised Cascade Process® LNG liquefaction technology.

There are two export offtake agreements in place for the LNG - 7.6mtpa to JV partner Sinopec, and 1mtpa to Kansai Electric, both for 20 years. ConocoPhillips, along with the shareholders of Australia Pacific LNG, value a constructive and trusted relationship with their local and regional communities, landowners and stakeholders from all levels of Government. Australia Pacific LNG has invested more than \$41 million into community support programs. Community investment in long-term sustainable programs is an on-going priority for ConocoPhillips.

As our service range has expanded over the years we've never lost sight of our goal of setting new standards.

Contract Resources was founded in New Zealand back in 1989 by five people passionate about offering clients specialised industrial services that were uncompromising on quality and safety.

The company has now grown to a network spanning five continents.

With three of the founding partners still working in the business, this entrepreneurial approach to service delivery lives on in the company today.

Our services include:

- Catalyst & mechanical
- Tank & environmental
- Heat exchanger
- Shutdown & turnaround
- Chemical cleaning
- Hydro-jetting & cold cutting
- Industrial coatings
- Pipeline services
- Wind energy services
- Specialised hazardous waste

Corfield's Electrical Service was established in Gladstone in 1983.

Corfield's large modern workshop is equipped to carry out a wide range of electrical installations and repairs for industrial, commercial and construction requirements.

We are proud to have ISO 9001:2008, ISO 14001:2004 and ISO 4801:2001 accreditations, as well as being an Ergon accredited contractor.

We pride ourselves on our high quality of workmanship, flexibility and ability to complete projects ahead of schedule.

Our reputation as a solid reputable company is growing, developing enormous opportunities, and establishing solid working relationships with many local and overseas companies.

Meeting the requirements of heavy industries holds no barriers.

Corporate Protection Australia Group is a Queensland based international organisation with over 18 years experience in our dedicated environment.

We provide premium corporate, both human and asset protection solutions to the mining, oil & gas, energy, critical infrastructure and maritime industries.

We offer a unique and consolidated delivery model tailored to suit the 'front line response' requirements of the resource and critical infrastructure industries.

We are a values based company, priding ourselves on integrity and loyalty to our staff and clients.

We stand by our reputation as being a lead leadership and governance are applied to our contracts.

We have one of the largest private firefighting forces in the southern hemisphere, and provide medical and security personnel to engagements across Australia and internationally.

Our RTO baseline training also provides quality workplace health & safety education and training throughout Australia.

Custom Fluidpower is one of the largest and most innovative providers of hydraulic, pneumatic, and electronic solutions in Australia.

Our product range includes pumps and motors, manifolds, power units, industrial brakes, electronic controls, filtration and lubrication products and we can even service your existing equipment too.

We have the capability to provide complete engineered solutions to industry leaders, where we design a custom system, and then complete installation, commissioning, and ongoing servicing.

We understand industry's harsh working environments and match those conditions with world leading products.

D & S Supplies is a multi-skilled workshop based in Boyne Island that can supply a vast range of services from our workshop.

Our core capabilities include:

- Structural and non-structural welding;
Commercial and industrial maintenance;
Steel fabrication;
Mobile welding service;
Hire service including steel access platforms and stair units for demountable buildings.

The capability of our people underpins every aspect of what we do.

We provide consistently high quality products designed to optimise value for money for our clients.

Dennis Contracting Services has been servicing the Gladstone Region for over 40 years in the slashing and revegetation sectors.

We service residential, industrial and mine sites.

We have expanded our services in recent years to include tree removal services with a qualified arborist on our team, and have purchased a MulchTech grinder that can turn vegetation and waste timber into a reusable revegetation product.

We can manage your vegetation management needs from clearing, grubbing and tree removal of sites, to soil and site preparation, revegetating via hydromulching, rip seeding or dry seeding and tree planting.

We are stockists of seed and erosion control products.

## Downer EDI Engineering Power

**ABN:** 53 000 983 700

**Street Address:**  
7 Rooksby Street  
Gladstone, Queensland 4680

**Ph:** +61 7 4970 3922

**Email:** gladstone.reception@downergroup.com

**Web:** www.downergroup.com

Downer Gladstone provides support to local industries in the EPCM fields of power generation, refining, chemical manufacturing, material handling and structural integrity works.

Services include, electrical, mechanical, specialist welding, boiler making, surface coating, temporary access, insulation and structural.

Downer Australia more generally has the facilities and broad base to provide a full asset service solution which can be leveraged locally to support our endeavours. This is inclusive of engineering, drafting and highly specialised services in the fields of HV switching, switch room design and build, specialist welding procedure development and engineering support for boiler and industrial applications.

We have access to large fabrication facilities such as the Downer rail division's Maryborough workshop where full locomotives are built for local and international clients.

In addition to this, Downer's Spotless arm can be leveraged to support facility management and asset maintenance requirements including fibre optics, facilities maintenance, air conditioning and gas repairs.

## Efex

**ABN:** 14 156 655 033

**Street Address:**  
15A/45 Dawson Highway  
Gladstone Queensland 4680

**Ph:** +61 437 228 105

**Email:** dennis.black@efex.com.au

**Web:** www.efex.com.au

EFEEX is a young and keenly progressive managed services company that devises and deploys print, IT, network, cloud and voice and data solutions that are flexible, scalable, elegantly simple yet extremely robust, and surprisingly cost effective. We right-fit a mix of award winning hardware and services to deliver faster workflows. You will easily recognise the difference that reduced downtime and a single point of contact to support, maintenance and helpdesk issues can make to office productivity.

We provide photocopier, printer and complete office solutions that allow our clients to improve productivity, monitor workflow and reduce their costs.

An Australian privately owned company, we have already made a splash in our four years of operation. We have rocketed up to number 20 on BRW's Fast Starters List, up from number 66 in 2015 and are two-time CRN fast 50 runners up in '15,'16' – making us one of the fastest growing technology companies in Australia.

FITT Resources commenced trading in 2008 from the merger of 2 entities - Chesterton Australia and Flow Management Australia.

Fast forward to 2019!

We are now a \$24M turnover product and service business with 42 employees that specialise in the sale, service, repair, and upgrade of rotating and static equipment.

We have a dewatering division specialising in both slurry and standard water submersible pumps, as well as trailer mounted units.

We also have a civil works division specialising in concrete reclamation (sewage stations, manholes, trickle filters, process plant equipment bunding).

This is all achieved at our 2100 sq2 reliability centre on the central coast of NSW, and now in our new repair facility in Gladstone.

At FITT Resources we back up our outstanding range of mechanical engineering products and parts with first class on-site servicing throughout Australia.

We have specialist experience across key industry sectors, which means we offer more than a simple repair service.

FITT Resources offers a tank-to-tank system review approach that delivers long-term equipment reliability and guaranteed customer satisfaction, and we are a full service supply partner with the shared objective to increase the mean time between repair of plant equipment and reduce the total cost of ownership.

Fodico Marine Group is a collective of closely related marine logistics companies incorporating Fodico P/L, East Coast Maritime, and Hydro-Tow.

We have a combined total of more than 40 years experience in providing vessels & equipment for both inshore & offshore operations within & beyond Australian waters.

Our principal products and services include:

- Fully crewed range of tugs - Towage/ inshore and offshore works;
- Roll on Roll off (RoRo) and landing craft, tank barge operators with significant capacity;
- Flat top barging providers with an extensive range up to 2,150 tonne cargo capacity;
- Specialised vessels for construction, port maintenance & surveying;
- Salvage, offshore supply for cargo, fuel, water and crew vessels;
- Extensive inventory of shore based support plant & machinery;
- Laydown, storage, ramping & crane load out facilities are also available.

Foxheat offers a wide range of onsite heat treatment applications and methods.

Whether it is heat treating small pipe welds or large tanks, Foxheat delivers a reliable and professional service.

Since its establishment in 2007, our objectives are to continue to be competitive, successful and a respected provider of onsite heat treatment services throughout major industries.

As an employer, Foxheat is committed to providing a safe and rewarding work environment to all our employees.

ONSITE APPLICATIONS INCLUDE:

- Post Weld Heat Treatment (PWHT)
- Normalizing
- Solution annealing
- Post heat treatment
- Stress relieving
- Pre-heating
- Hydrogen bake out
- Refractory dry outs
- Shrink fit
- Unblocking frozen lines
- Paint curing

Fredriksen Maclean & Associates have been providing surveying services to the Gladstone region for the past 30 years.

During this time we have worked on most major projects in the area and have a considerable archive of historic data.

Our services include cadastral (boundary) surveys, contour & detail surveys, construction surveying, as constructed surveys, volumes, development applications, mine operation survey, mine development surveys, mining leases & subdivision, minor hydrographic surveys, aerial surveys from drones.

In recent times we have expanded into aerial surveying from an unmanned aerial vehicle (UAV) through a collaboration with a closely related company called MapVis P/L, unmanned aerial imaging.

This company has all the CASA approvals and insurances to operate commercially and provides us with high quality images that when processed create accurate digital terrain models for contouring and volume calculations.

The clarity of videos from the UAV provide an excellent tool for inspections of inaccessible plant and dangerous areas.

We have recently added a "Smart plane" with PPK positioning to the fleet which enables longer flying times and photo coverage of large areas.

Established in 1928, GHD is one of the world's leading professional services companies operating in the global markets of water, energy and resources, environment, property and buildings, and transportation.

We provide engineering, architecture, environmental and construction services to private and public sector clients, and have maintained a permanent presence in the Gladstone region since 2001.

Our local team provide a tailored, responsive service backed by the global GHD network.

We deliver projects with high standards of safety, quality and ethics across the entire asset value chain.

Driven by a client-service led culture, we connect the knowledge, skill and experience of our people with innovative practices, technical capabilities and robust systems to create lasting community benefits.

We are guided by our workplace health, safety, quality and environmental management systems, which are certified to international standards.

Responding to our clients involves trust, the ability to produce on time, on budget, to specification and with high reliability.

We use an innovative approach to accommodate and address challenges to give us a decisive edge when delivering projects.

By combining our talents, utilising the latest technology, adopting effective management techniques and teamwork, we have succeeded in delivering numerous major projects in the Gladstone region.

Our services encompass all phases of an asset's life, including engineering, planning and approvals, detailed design, project management, construction phase inspections and advice, as well as asset audits and environmental services.

Gibson Building is passionate about smart and innovative design.

We pride ourselves on the level of quality construction and attention to detail that we bring to each project.

We specialise in designing and building homes suited to your lifestyle.

Gibson Building was formed in March 2005 by Kieran Gibson.

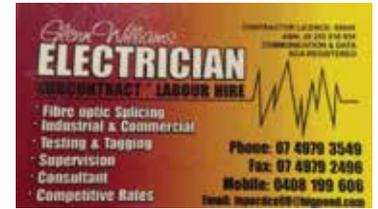

Kieran has a solid background in the construction industry. Following graduation from the Royal Melbourne Institute of Technology with both a Diploma of Building and a Graduate Diploma in Property.

Kieran worked for leading commercial-industrial builder Vaughans Construction for many years. Since then he has worked on numerous commercial and residential projects in the United States, Canada, and the Caribbean.

Our airport is one of Central Queensland's most important pieces of infrastructure. It is our gateway to industry, tourism and an essential part of our transport network, connecting to passengers to destinations on their journeys all around Australia and the world.

We aim to deliver a world-class regional airport experience and foster the growth of aviation for the benefit of the Gladstone Region.

We're committed to continually improving everyone's airport experience by pursuing and responding to feedback, using the latest technology and delivering resourcefulness to increase the overall airport experience.

Gladstone Drafting's focus is to service the local resource industry, construction, mining, infrastructure, local government and the building design sectors.

We are experienced on most of the local industrial sites and importantly gain repeat business with these clients.

We are a specialist multi awarding winning multi-disciplinary design drafting firm applying engineering, design and drafting services from conception to completion.

Gladstone Drafting is unique in central Queensland because of its approach to managing complex projects and its ability to supply all necessary complementary services in house from start to finish.

### Why the multi-discipline method?

The benefit of this approach means we expedite projects more quickly with fewer variations, greater accuracy and ultimately on time completion, all of which save money and finish projects on or below budget.

Communication breakdowns are kept to a minimum and our extensive knowledge of local conditions, planning regulations and trade competencies in this area help eliminate much of the risk and barriers to completing small, medium or large projects on time.

We are a locally owned business that has been operating for 30 years in Gladstone.

We deliver a range of services including electrical, air conditioning, refrigeration and engineering solutions to industry and the resources sector across central and western Queensland, 7 days a week.

Our current client base consists of many major local industries and supporting contract groups.

Based in Gladstone, we are equipped with site compliant vehicles and a team that is safety focused and site inducted for many of the local industrial sites.

GRA specialises in being a one-stop solution for tier 1 companies who mobilise to mine and gas sites to undertake major projects and service/ breakdown.

Our experience and reputation for quality work makes us the preferred partner for major companies working in this industry.

With over 40 years experience, Glenn Williams Electrical has a wealth of knowledge having worked in both a domestic capacity and industrial at plants including QAL, BSL, Rio Tinto and GPC.

Commercial, single or 3 phase power for shops, sheds and factories is what we do every day.

Large or small, we can help your business with new electrical work or maintenance.

From planning to commissioning, we provide a range of electrical services catering for large and small construction projects and the mining industries.

**Email:** admin@golding.com.au

**Web:** www.golding.com.au

Golding delivers safe, flexible and cost effective project solutions in urban, regional and remote locations for the resources, utilities, property and transport sectors.

Since our establishment in 1942, we have grown into one of the largest privately owned civil construction and mining services companies in Queensland.

Ongoing success over the past 70 years has allowed us to expand our capabilities into New South Wales.

The capability of our people, assets and business systems underpin every aspect of what we do.

We provide reliable quality resources to deliver optimal value for money solutions for our clients.

We have a deserved reputation for reliably launching, delivering and closing projects.

We work dependably to deliver within the required timeframe for the agreed price while ensuring excellence in quality, safety, environmental and community performance.

We take a considered, practical and disciplined approach that eliminates rework and waste.

We encourage visibility in relation to cost and create ways to embed savings and improve productivity on all projects.

We have consistently demonstrated our ability to adapt to achieve exceptional results for our clients.

We achieve success under varied contract delivery methods, including construct-only, design and construct, early contractor involvement, alliances and joint ventures.

## Greyhound Resources

**ABN:** 41 127 636 579

**Street Address:**

PO Box 1475  
Eagle Farm QLD 4009

**Ph:** +61 436 849 176

**Email:** Tania.mcnaught@greyhound.com.au

**Web:** www.greyhound.com.au

Greyhound has been moving people and minds for more than a century.

As the industry leader in coach transport, we've been a fixture on Australian roads since 1905, and we have built Australia's only national coach network.

With innovation constantly at the forefront, we began developing tailored transport solutions for the resources sector in 2006.

Applying the lessons we learned from decades of delivering safe and trusted express, charter and freight services, we soon set a new standard for workforce transportation in the mining and resources industry.

Today, Greyhound Resources transports 5,797,295 passengers and travels 13,595,850 kilometres each year across the Australian mainland. Through our 24/7 National Operations Control Centre, we have the ability to manage and monitor our drivers and vehicles in real-time, utilising cutting-edge technology to ensure the safety of your staff, protect your schedules and guarantee you meet your chain of responsibility obligations.

Greyhound have 4 business units ready to support your requirements.

(i) Greyhound Resources - delivering workforce transportation services across Australia.

(ii) Greyhound Freight - a commercial and retail freight business on the back of the express network.

(iii) Greyhound Charters - providing ad hoc charter services to business, government, schools and sporting clubs. These services include site tours, social and VIP events.

(iv) Greyhound Express network - operating across the country, connecting the general public to cities, towns and regional centres.

We install automatic greasing systems to any type of vehicle including buses, trucks, trailers, agricultural machinery, fixed plant and heavy earthmoving equipment.

As well as being able to provide high quality products and solutions, we are committed to providing premium customer service.

We have been active in the development, production, marketing and sales of innovative products and services in over 22 countries for more than 48 years.

Heavy Equipment Maintenance is a diesel mechanical business specialising in the servicing and repair of industrial and commercial vehicles.

Our workshop, mobile and on-site services are focused exclusively on offering our skills such as; diesel fitting, regular maintenance, engine rebuilds, fleet maintenance and we specialise in heavy vehicle wheel alignments.

Whether it is scheduled maintenance or an emergency breakdown service, your vehicles and equipment are in the best of hands.

All members of our team have undergone the training necessary to provide such care, regardless of the vehicle, machine, site or situation.

Our service is backed by hard earned expertise and a dedication to providing the utmost care.

High Risk Solutions have highly qualified staff that are trained in all high risk service areas including rigging, scaffolding, rapid response scaffold teams, site mobilisation and more.

If you need a job done right, we are the team to contact.

We are a family owned, Gladstone based company servicing Australasia with scaffolding and rigging services.

We deliver the erection and dismantling of scaffolding safely and cost-effectively with a 1,000 tonne scaffold capacity right here in central Queensland.

With 30 scaffolders on staff, our crew are inducted on every site in Gladstone.

We work with industry partners and suppliers to develop improved industry practices for scaffolding and rigging applications, customised shutdown packages and low transport costs.

Our fields of expertise is supplying special cables for industrial application from European based and ISO 9001 certified manufacturers, including cables for crane, lifting and conveyor systems, heat-resistant cables, cables for drag chains and robotics, flexible SERVO-cables, fibre optic cables, instrumental cables and for data transmission.

We are supplier of industrial automation from world-renowned manufacturers: Encoders, Power Switching & Control, Variable Drives, Sensors, Heat Protection Solutions, IGBT-modules and more.

Also we are an exclusive distributor of an anticorrosive zinc-rich mixture ZINTEC. It is a liquid composition, which is completely ready for use consisting of electrolytic high chemical purity zinc (zinc - 96% in dry film) and binding agents. ZINTEC is film zinc coating, effectively protects ferrous metals from corrosion, providing both active (cathode) and passive (barrier) corrosion protection.

Inglis Survey and Mapping is a survey and mapping company dedicated to providing our clients with professional and direct surveying services through innovation and experience.

Established in 2012, we strategically based our operations in Gladstone to create a central point for servicing state wide projects.

Due to our location, we can provide services and support for large or small project work where constant interaction is vital in completing the project on budget and within time constraints.

During the past four years we have provided exceptional service and value delivering surveying services for some key infrastructure projects including:

- Wiggins Island Coal Export Terminal (WICET);
- Wiggins Island Balloon Loop;
- Eight Mile Creek Bridge and approach road in Bajool and the widening & intersection upgrade in Marmor;
- The Gayndah and Monto airport upgrades.

Passion, persistence, integrity, innovation, knowledge, team work Today, LJ Hooker is one of the largest real estate agency franchise groups in Australasia with over 700 franchises and 8,000 staff.

We are proud of our history and proud to be the number one real estate brand in Australia.

We are passionate about environmental sustainability and achieving this through the rehabilitation of degraded landscapes as a result of mining or construction activities.

By working with our clients, we are able to develop tailored solutions to ensure effective, long term results.

We provide a variety of environmental contracting services to achieve these aims:

- Civil works, including ground preparation and topsoil replacement;
- Soil analysis and the development of Environmental Management Plans;
- Soil recycling, amendment and screening;
- Revegetation, with hydromulch, organics blanket or direct planting;
- Erosion control, with innovative geotextile products or traditional erosion control matting;
- Commercial landscaping and irrigation with ongoing maintenance.

Established in 1990, we have a strong reputation for providing reliable services to a broad range of industries including:

- mining
- Main Roads
- pipeline construction
- government (local and state)
- civil construction
- environmental
- water treatment.

Lanyonscapes has the experience and capacity to manage small and large projects, including multimillion dollar projects spanning several years.

We are remote area specialists, focusing on Queensland and the Northern Territory.

Laogard Pty has been operating its steel and metal fabrication business from its current facilities since 1999.

Our have ranged from BBQ's and artwork at Canoe Point through to galvanised pedestrian bridges at the Tannum wetlands and the manufacture of 24 x 30 cubic metre waste transfer bins.

Building works have included detail design, fabrication, painting structural steel for a number of regional IGA and Target stores in addition to several warehouses in Brisbane and the Gladstone region.

Our work for the Boyne Smelter has varied from a 10 metre elevating maintenance platform for line 3 crane carousel maintenance, the manufacture of three stainless steel cooling towers to numerous handrail and platform fabrications.

We are a family owned and operated business with over 30 years experience in the crane hiring industry.

We take pride in our safety and reliability and are committed to service excellence and building strong relationships.

We offer a wide range of onsite services and solutions to clients working across the heavy engineering, building and construction, mining, manufacturing, maintenance, road and rail industries along with general hire for any task.

Our depots in Gladstone and Biloela employ over 100 personnel and we have a growing fleet of 70 cranes ranging from 2.6T to 280T available for either wet or dry hire.

We also have a large fleet of transport and heavy haulage equipment to assist clients in any of their lift and shift requirements.

Our modern crane fleet includes:

- Pick & carry cranes
- Mini cranes
- Truck mounted hydraulic cranes
- Crawler cranes
- Hydraulic crawler cranes

Lee Crane Hire has a professional attitude and commitment to all our clients which has given us a strong participation in business growth and development in the Gladstone and central Queensland regions.

LINE-X® is a global network of creative thinkers, problem solvers, and entrepreneurs. Our protective coatings products are market leaders, supported by cutting-edge technology. With our extensive knowledge and experience in the protective coatings and automotive industries, we support our partners in over 70 countries on every step of their journey with us as they discover the wide range of opportunities available to a LINE-X International Partner.

LINE-X® is not just for spray-on bedliners. You can spray LINE-X on just about anything that needs protection, from your boat, trailer and motorcycle to work trucks and fire trucks. The LINE-X range of tough, durable coatings are guaranteed to protect more than just your truck from the harshest elements. With manufacturing and military applications, LINE-X has you covered. We also provide all types of truck accessories, including our exclusive product line, Truck Gear by LINE-X, which is backed by a Lifetime End-to-End Warranty. Whether you are in the market for a bedliner, vehicle accessory or need advanced coating protection – we have the answer . . . LINE-X IT!

Masters Surveying is an integrated, multidisciplinary surveying services provider offering the full range of cadastral, construction, mining & engineering surveying services.

We have provided services to private, corporate and government clients for over 25 years.

With branches located in key commercial, industrial, and mining centres throughout Queensland and New South Wales, our geographic coverage enables us to effectively service the energy and resource rich regions, construction and public sectors.

Our 70 plus workforce operates from offices in Mackay, Gladstone, Longreach, Rockhampton, Wollongong and Brisbane.

With a combined skill set, dedication to technical proficiency, contemporary professional practices and experience, we are well equipped to satisfy the most challenging operational requirements and maximise the return on any project.

We are a privately owned civil contracting firm providing a diverse range of civil construction services to major industries and mining operations throughout Queensland.

The McCosker head office is located in Gladstone, with satellite offices on regional sites.

This enables McCosker operations to successfully service industrial and mining projects throughout Queensland.

We believe our great success has been achieved through an open, honest and productive culture. We foster a cooperative management style and commitment to common business objectives with our clients in order to deliver a product and service that exceeds expectations. Our long term client base is testimonial to this commitment.

We take pride in our work and our goal on any project is to achieve a 'win-win-win' outcome for the client, employees and the community through a genuine dedication to safe, sustainable and responsible operations.

McCosker's success is widely recognised by our peers and industry and we rank among some of the top private companies in Queensland.

## Monadelphous

**ABN:** 43 010 923 305

**Street Address:**

1/73 Hanson Road  
Gladstone Queensland 4680

**Ph:** +61 7 4972 3166

**Email:** gladstonecontracts@monadel.com.au

**Web:** www.monadelphous.com.au

Founded in 2012, our sole purpose is to provide scaffolding and rigging services.

Our goal is to provide a quality service to our target market, with safety and timely performance being of the utmost importance.

We provide access & rigging solutions for the mining, marine, industrial, commercial and residential markets, for the maintenance and construction of the related plant, equipment and structures within these sectors.

We have the ability to design construct and engineer certify any temporary structure on short notice.

Mini Excavations has been operating in the Gladstone region for nearly 30 years.

Our workskills have expanded to include sand extraction and bulk tipper deliveries of topsoil, roadbase, calcareous limestone aggregates, sand, agricultural lime and regulated waste.

We are also Gladstone's largest supplier of organic garden blends.

We transported materials to the three Curtis Island LNG projects and the WICET project.

We have, over many years, supplied quarry materials, sand and bulk tipper haulage for many of the civil contractors, public utilities and councils working in and beyond the Gladstone region.

We are fully compliant to NHVAS in mass management, maintenance management and standard fatigue allowing us to maximise our tonnage on certified road friendly PBS equipment.

Monadelphous provides construction, maintenance and industrial services to the resources, energy and infrastructure sectors.

We build, maintain and improve customer operations through safe, reliable, innovative and cost effective service solutions.

Monadelphous recently completed the expansion of the Abbot Point Coal Terminal X50 Stockyard for the North Queensland Bulk Ports Corporation.

In addition, our business also includes electrical and instrumentation services, fabrication, modularisation and installation of structural steel, plant commissioning, demolition, piping, marine and pipelines.

Resources, energy and infrastructure are our core markets.

## MPV Sandblasting & Coating Services

**ABN:** 886 2711 4433  
**Street Address:**  
1 Boys Road  
South Trees  
**Ph:** +61 406 600 408  
**Email:** admin@mpvservices.com.au

MPV Sandblasting & Coating Services is a locally owned and operated business founded in 2016.

Our vision is to strive to become a leader in the industry, providing quality, professionalism, flexibility & cost effectiveness within the central Queensland region.

We provide workshop & mobile sandblasting and coating services including heavy machinery protective coating, surface protection of structural steel, workshop coating with on-site touch ups, maintenance work and refinishing of recreational craft & trailers.

Quality control is carried out on works by our team to ensure specification & warranty for products are met.

In 2018 we became authorised dealers of Speedliner (Spray on tub liners).

Speedliner not only provides protection for ute, trucks & recreational craft, but also can be used in industrial applications.

We pride ourselves on maintaining a strong safety culture and continually work on ways to improve our practices.

## Multitrade Building Hire

**ABN:** 36 010 138 600  
**Street Address:**

Gladstone Queensland 4680  
**Ph:** +61 7 4979 2333  
**Email:** multitrade@multitrade.com.au  
**Web:** www.multitrade.com.au

Multitrade Building Hire has over 30 years of experience in the hire and sale of transportable Buildings.

The team is able to design a building to meet your specific individual requirements.

We will deliver and install your transportable building and will travel to complete tasks in a broad range of locations.

We supply temporary site buildings for accommodation, staff training, meal rooms, offices, secure storage and bathroom amenities.

Our customers can choose from a generous range of standard building sizes and a comprehensive choice of optional fittings.

We also work with our clients to custom-design temporary premises to suit special industry or site-specific requirements.

As a Queensland-based independent business our autonomy and central location means we can make decisions on the spot to prevent delays to your project if unexpected schedule changes occur, or if you need to add, extend or change your contract.

## National Australia Bank

Onsite Rental Group (Onsite) is your specialist B2B equipment hire partner.

We deliver Total Rental Management solutions to a vast majority of Australia's largest mining, oil & gas, construction, industrial, infrastructure, government and event organisations.

Our customers value Onsite for a number of specific reasons.

Firstly for our commitment to long term strategic investment in data driven reporting, providing transparent 'Total Rental Management' solutions.

Secondly, our approach to 'real-world' problem solving, through innovative asset tracking to drive down your rental equipment costs.

And finally, our team of industry recognised experts. Our people deliver specialist expertise with no manufacturer bias to give you a bespoke 'Total Rental Management' experience.

We have over 450 employees across more than 30 branches and multiple partner site locations.

With over 30 years of experience in the business of equipment rental we are adept at solving our customer's 'pain points' and delivering the right equipment for your task.

We offer a range of more than 70,000 pieces of equipment for everything including access, generation, lighting, earth-moving, excavation, compaction, welding, industrial tools, traffic management, compressors, pumps, material handling and portable buildings.

We offer warehousing and lay-down facilities in the Gladstone area.

The full facility comprises of a warehouse of 2,000 sq. metres and adjoining open land of 5,540 sq. metres suitable for external storage.

Our facility is conveniently located on the corner of Callemondah Drive and Shona Avenue, adjacent to the Gladstone Airport.

The warehouse can be utilised as a totally open area of 2,000 m2 with a large drive-through facility or it can be easily divided into smaller areas of 250 m2 or 500 m2 or combinations of those areas.

The warehouse has high internal clearance and is suitable to take overhead cranes and travelling gantries.

Prizm Engineering is a full service (civil, structural, mechanical & electrical) consulting engineering company with offices in Gladstone and Brisbane.

We have expertise in all aspects of delivering consulting engineering, contract and project management services to local industry.

Our services are delivered to a diverse range of industries including refining, smelting, chemical, mining, petrochemical, oil & gas, infrastructure and power generation.

We deliver professional solutions from small scale engineering deliverables to large scale complex project management.

We pride ourselves in implementing our services in a professional and cost effective manner through careful management of our overhead cost and focussing on the client's needs.

We do this without compromising safety to personnel or impact to the environment through our vision of Zero Harm.

- Industrial Maintenance
- Turnpoint

Pronto Autoglass is the premier automotive windscreen company servicing the Gladstone region.

We are a family owned and operated business with an emphasis on customer care and quality workmanship.

Our business has been a part of the automotive window industry in the Gladstone region for more than 20 years.

We pride ourselves on being the team with the local knowledge of the region and can offer comprehensive car window repair and replacement installation solutions.

We pride ourselves on being locals.

Our services cover windscreen repairs and replacements, side and rear replacements, fleet, perspex, and we can cut and install plate and laminate glass.

QER is an Australian company headquartered in Brisbane, with a New Fuels Development Centre located near Gladstone.

The company was formed to help tackle Australia's growing reliance on imported transport fuel. For example, 85% of the diesel used to run our farms and mines, bring in tourists and stock our supermarket shelves is currently derived from overseas sources. New, Australian sources of high quality transport fuel are needed to help reduce this dependence.

QER has tenements and a sustainable technology to develop Queensland's largest kerogen shale reserves (also known as oil shale), containing some 18 billion barrels.

The company has successfully operated a demonstration plant at its Gladstone site, producing ultra low sulphur transport fuels – mainly diesel and jet fuel, which were proven to meet retail fuel standards through a comprehensive program of testing and trials. The operation was thoroughly reviewed by Queensland's department of Environment and Heritage protection and found to meet and better all of the high environmental standards required under its licence.

Following the successful completion of the trials, QER has plans for a commercial new fuels facility to be located on the Stuart oil shale resource at its Gladstone site, with a capacity to produce around 8,000 to 12,000 barrels a day of finished fuels, mainly ultra-low sulphur diesel. Such a project would form the core of a new industry with the potential to create many hundreds of jobs.

## QMC Group

**ABN:** 29 067 829 323

**Street Address:**

3 Warne Street  
Gladstone Queensland 4680

**Ph:** +61 2 8882 8000

**Email:** [admincq@qmcgroup.com](mailto:admincq@qmcgroup.com)

**Web:** [www.qmcgroup.com](http://www.qmcgroup.com)

Quality Management & Constructions P/L, trading as QMC Group, is an Australian owned company established in 1995 and based in Qld since 2004.

We opened the Gladstone Office in 2005.

Our team are local residents and we now service all of Queensland from our Gladstone/Rockhampton base.

We offer broad expertise in civil, mining and building construction and have the capacity to provide 24 hour service across the eastern side of Australia.

We have successfully completed projects that include the construction of power stations and sub-stations, detailed and bulk excavations, roadworks, bridge construction, construction of pipelines for communications, drainage, sewerage and water, railway construction and re-construction, building and building maintenance, restoration and heritage works, and environmental protection works.

We have developed innovative and alternate solutions for projects that result in delivering better outcomes for all stakeholders including the local communities we work in.

Our ongoing commitment to the community, our clients, quality, safety and environment and the implementation of our Integrated Management System has provided us with a measurable repeat business exceeding 90% continuously for the last 10 years.

## Queensland Aerial

**ABN:** 75 050 403 060

**Street Address:**

10/48 Latrobe St, Tannum Sands  
Queensland 4680

**Ph:** +61 401 793 602

**Email:** [info@qldaerial.com.au](mailto:info@qldaerial.com.au)

**Web:** [www.qldaerial.com.au](http://www.qldaerial.com.au)

Whether you're selling a property, advertising a rental or simply want artistic aerial photography of your land, we offer a range of packages from a handful of photos to complete cinematic video reels.

Our highly skilled post-production team will ensure that your property stands out in the market with additional options such as voice over, music or special effects to suit your needs.

Estate Development Aerial imaging has always been a popular tool for development projects, but not until now has it been easily justified in a commercial budget.

Our team can capture your development from multiple angles, at multiple stages of the project. We specialise in high definition mapping, precise land measurement and geo-referenced photography to assist the development planning before the project even begins.

Events Small or large, we can capture your event from a unique perspective.

Aerial imagery is the perfect way to showcase events, as often ground based footage cannot portray the full scale of the turnout. Use our footage to promote future events, acquire sponsorship and funding or gain governing body approvals.

## Queensland Gaskets

**ABN:** 18 159 148 295

**Street Address:**

18 Jaybel St  
Salisbury Queensland 4107

**Ph:** +61 7 3277 3922

**Email:** [sales@queenslandgaskets.com.au](mailto:sales@queenslandgaskets.com.au)

**Web:** [www.queenslandgaskets.com.au](http://www.queenslandgaskets.com.au)

Established in 1953 Queensland Gaskets is an Australian owned private company.

We manufacture high quality industrial gaskets and sealing devices for the fluid sealing industry.

We have a wide range of gasket materials in stock suitable for a broad range of applications.

Our abrasive waterjet cutting facility provides accurate two dimensional cutting to meet our customers' requirements.

Our experience enables us to cut a wide ariety of materials from gasket materials to metals including titanium.

Using up-to-date machinery, a complete range of soft cut gaskets for the Australian industrial market is manufactured from a wide range of gasket materials for an equally wide range of industries.

Our gaskets are used in areas such as sugar mills, hospitals, mining, ship building, alumina plants, railways, truck assembly plants, sewerage plants, pipeline constructions, water supply, foundries, breweries, food processing plants, fire prevention, refrigeration, sand mining and dredging, and electricity generation.

QWEST Crane hire is a locally owned crane hire company based out of 3 depots in Central Queensland. Featherstone Street, Rockhampton, Callemondah, Gladstone and Gregory Highway, Capella. With a fleet of over 25 cranes and 45 staff, we are capable of mobilising and assisting with any of your crane requirements.

QWEST Crane Hire recently purchased a local crane company in Central Queensland with a clear plan to expand and upgrade its current fleet and deliver services to a broader market within the region. We are currently based in Rockhampton and Yeppoon, and have succeeded in our commitment to open our third depot in Emerald by the end of 2017.

Rayment Excavations is a family owned and operated business that provides civil construction services within the industrial, commercial, corporate, government and domestic markets.

We primarily service the Gladstone and central Queensland region, however, we are also involved in state-wide and national projects.

Our transport and distribution fleet consists of over 160 pieces of equipment including but not limited to excavators, loaders, backhoes, bobcats, rollers, graders, dozers, screens, crushers, tipplers, water trucks, dump trucks, prime movers and low-loaders.

Our team is in the business of selling quality products and supplying quality service without commitment to excellence.

We conduct road works and maintenance, bulk earthworks, rail construction and maintenance, ash placement, landscaping, retaining walls, trenching, dams, fire breaks, driveways and deliver potable drinking water.

We are focused on personalised solutions and earn our customers loyalty through striving for excellence and exceeding their expectations.

Rivers is an Australian owned company that was established in 1981. Our success is due to our belief in doing business with clients who, like us, are committed to building strong and lasting relationships. We believe in offering the highest quality advice and service no matter what size of company or business you operate.

After helping individuals and businesses with their insurance requirements for over 38 years, we know how to make sure you're truly protected.

As insurance brokers, we offer much more than just comparing policies and providing the best deal. We have a deep understanding of insurance fine print and that can save your bacon down the track if bad things happen.

We are a member of the Austbrokers Group, which is a national network of insurance brokers with a combined premium turnover in excess of \$2 billion in general insurance premium, employing over 2,200 people and who operate from over 170 locations, Australia wide.

Each Austbrokers member operates their own autonomous business trading under their own names with the ability to tap into a rich pool of expertise, facilities and support to access a vast range of opportunities particular to the needs for our clients.

In addition to this Austbrokers has formed a joint venture (AIMS) which combines the influence and buying power of the Austbrokers, Advisernet and IBNA networks, which controls over \$4 billion in insurance premiums. This provides access to not only Australian Insurers and Lloyds, but also many other overseas Insurers.

RKF Engineering Services is an award-winning specialist engineering consultancy working within the Australian mining, marine, transport and heavy industries. Established in 1987, we've been around for three decades and have offices in Perth, Brisbane, Wollongong and Gladstone.

RKF Engineering Services has long been recognised amongst its peers as a leader in structural engineering, remediation and design, concrete technology and cathodic protection. We've worked with some of Australia's leading companies and continue to be sought after by local and international clients abroad for the technical expertise, specialist knowledge and superior value that we bring to each and every project.

We also have extensive expertise in structural engineering, structural remediation and project and asset management.

RoadPak Industries P/L are a local Gladstone family owned business specializing in water infrastructure, Earthworks, civil construction and maintenance.

We are committed to developing our growing, sustainable business catering to the ever changing Civil Plumbing and Earthworks industry by utilising our strengths of specialist industry knowledge, equipment and services.

RoadPak Industries are a dedicated team striving to achieve success through a strong work ethic, positive outlook on safety and our highly skilled team of industry professionals.

Services:

- Excavation
- Horizontal Directional Drilling
- Service Location
- Earth Moving
- Post Hole Digging
- Confined Space (mini excavator)
- Compacting
- Pool Excavations
- Trenching
- Boring
- Pit Installation
- Site-Cuts

Robinson Engineering Surveys (originally Peter Robinson and Associates) is a family owned business operating in Queensland since 1986.

We are leaders in specialist marine and offshore structure surveying and have the capabilities and experience in rail infrastructure, earthworks, road, structural and material handling, cadastral, mine, plant, industrial and monitoring surveys.

We deliver unrivalled productivity, quality, safety, planning, technique and management.

All our surveyors are taught in this specialised field of surveying.

We can provide specialist surveying services to all types of marine projects, whether it be a wharf extension, construction of a new wharf, ferry terminals, MOFs, LoLo and RoRo facilities, underwater DEM analysis, or marina facilities.

With our marine experience we have advanced methodologies specifically for marine piling, marine structures and seabed analysis to ensure all works are in tolerance and have reduced set out times to maximise productivity.

With offices in Gladstone, Rockhampton, Agnes Water and Kingscliff we are positioned to easily provide services to both Queensland and New South Wales.

The company has been involved in most facets of construction/engineering surveying including: roads, rail, oil and gas, petro chemical, industrial, commercial, mining, materials handling, bridges, wharves and marine structures and machine guidance control.

Santos GLNG is a pioneering venture producing natural gas from Queensland's coal seams, to be converted into liquefied natural gas (LNG) for sale to world markets.

It involves ongoing gas field development in the Surat and Bowen Basins, a 420-kilometre gas transmission pipeline, and an LNG plant on Curtis Island, near Gladstone.

Santos GLNG is led by Australian company Santos, in partnership with three of the world's leading energy companies –PETRONAS from Malaysia, Total from France, and KOGAS from South Korea.

Santos GLNG will be operating in the Gladstone region for decades to come and is proud to be a long-term member of such a great community.

A wholly owned subsidiary of Score Group PLC, we specialise in intelligent valve and gas turbine solutions as well as specialist coatings and cell disruptors.

Score Group PLC operates worldwide providing engineering services across five continents within a range of sectors which include oil & gas, nuclear and marine.

Score Brisbane is based in the CBD of Brisbane and focuses primarily on coal seam gas and oil and gas activities on the Eastern Seaboard of Australia and New Zealand. Our Gladstone facility is a bespoke valve repair centre providing support to upstream facilities in the Surat Basin and midstream facilities on Curtis Island.

The services provided by Score Brisbane include:

- Total Valve Management contracts
- New valve & actuator supply
- Valve & actuator repair
- Valve modifications
- Valve testing (FAT)
- Field support
- Engineering support
- Project supply
- Supply chain inspection & expediting
- Valve diagnostics & condition monitoring
- Warehousing and inventory management

ShedEx is a locally owned building and construction company specializing in steel framed buildings including warehouses, factories, workshops and industrial buildings.

We work with clients to provide the best building solution which can include Cold-form, Hot-form, Tilt panel and hybrid designs.

Our strong portfolio of clients range from small to large scale businesses and organisations in the industrial, commercial, shipping and mining sectors.

We are proactive in developing and maintaining strong business relationships with clients and suppliers which we believe is fundamental to the delivery of successful building projects.

Our team is made up of highly skilled and dedicated personnel with years of industry experience.

Our local skills base of builders, project managers and administrators provide the capacity and ability to deliver projects on-time and on-budget.

**Web:** www.smitlamnalco.com

Shell QGC is a Shell-owned business and the world's first producer of LNG from natural gas sourced from coal seams. QGC has its headquarters in Brisbane, Queensland. QGC is one of Australia's leading natural gas explorers and producers, focused on developing Queensland's world-class gas reserves for supply to the domestic market and international customers. QGC operates a two-train LNG facility on Curtis Island, near Gladstone. The project loaded its 100th cargo in February 2016.

**Employment:**

Our peak construction workforce was 14,500. Our workforce has naturally declined as construction has been completed, but we are retaining a long-term operations team in Gladstone. Recruitment for that workforce has been completed and we are very proud that 98% of our 300 QGC direct employees and contractors are locals.

**Current status:**

In December 2014, QGC became the first operation in the world to produce LNG from natural gas sourced from coal seams. The facility loaded its 100th cargo in February 2016. Looking ahead, QGC is focused on continuing safe and reliable operations.

**Estimated production:**

The plant is expected to reach plateau production of approximately 8 million tonnes of LNG per annum in 2016.

Sherriff Electrical Wholesalers combines exceptional customer service with the best electrical products at the best price. We are 100% Australian family owned and our extensive range of high quality, reliable products and services are available online and through branches all over Australia. Our friendly staff provide superior service and expert advice to save you time and money and we can customise products and solutions to suit your needs.

We are your business partner with the infrastructure and expertise to support your business regardless of the size or location. We make it easier to manage your projects and have experience in a range of sectors such as industrial, commercial, residential, construction, oil and gas, mining, civil, health, education, and government.

Smit Lamnalco provides first class, reliable and customised marine support in challenging environments, ensuring safe and efficient operations in any part of the world.

We live by our purpose. We challenge our people, partners and stakeholders to always maintain the highest safety standards, adhere to industry best practices and strive to continuously improve the quality of our operations. At Smit Lamnalco we stand out from the competition because of our experienced, skilled and dedicated workforce. For this reason, we consider our people our biggest asset. We firmly believe that training, motivation and craftsmanship are essential to providing safe, reliable, cost-effective and best in class marine services in challenging environments.

Smit Lamnalco utilises a diverse fleet of Harbour & Terminal Tugs as well as Offshore Support Vessels. The fleet is spread over four continents and is operated by a variety of crew members.

Since January, 2011 SMIT Marine Australia has been providing berthing & unberthing services to vessels calling at the Port of Gladstone, complemented by barge transportation and coastal towage.

Solutions for Human Resources operates like an external human resources department for smaller businesses for whom an internal solution may prove too costly.

We believe small and medium sized businesses deserve access to the same level of support as larger organisations with in-house HR departments.

We work with small, medium & large organisations that are time and resource poor to help them navigate the murky waters of HR and workplace health and safety employee management.

We ensure our clients' vision, mission and values flow through all HR processes.

Often smaller businesses cannot compete on salary, but their corporate culture can set them apart from larger organisations.

We take your culture and embed it into your HR.

We offer a complete suite of human resources and workplace health and safety systems.

Sullair Australia is one of Australia's premium suppliers of compressed air, gas and vacuum solutions. Our product range includes a wide range of oil free and oil injected stationary electric air compressors from 1.5 kW up to 450 kW and diesel portable compressors from 185 CFM to 1600 CFM that are sourced from Sullair and Hitachi manufacturing facilities, and supply complete installations with compressors/air receivers / compressed air dryers, chillers, filters, Nitrogen generators and Vacuum systems. Our highly experienced team of engineers, design customised systems to suit individual client requirements and specifications.

Services:

- Service Maintenance Packages
- Extended Warranties
- Air End Exchange and Rebuild Facility
- Site Compressed Air System Audits
- Training programs for technicians and operators

Industries Served:

- Oil and Gas ▪ Manufacturing
- Mining ▪ Food and Beverage
- Pharmaceutical ▪ Power Generation
- Civil Construction ▪ Utilities
- Agriculture and Farming
- Chemical ▪ Defence
- Infrastructure ▪ Petrochemical
- LNG/CSG

SunnyJobs is more than just your average Labour hire company.

We are a multi-facet, technology based company providing specialist labour, workforce and HR software solutions across the Mining, Oil & Gas, Site Maintenance, Transport, Exploration Drilling, Industrial and Construction related industries.

We have partnered with industry leading HR, Recruitment and Payroll software providers, to provide the latest technology in this field. We stand by our product utilising our own systems collaboratively within our own Labour Hire organisation and our Client's businesses. No other agency can provide this holistic service model incorporating automation to rostering and allocation of skilled personnel.

Our in-house team members have experience at the 'Coal Face' in both administrative and on the ground supervision during the Construction and Maintenance activities across numerous sites within Australia. This has allowed us to build many valuable relationships and develop a high quality workforce and has also allowed us to better understand industry needs from both our clients and employees perspective.

Our workforce is capable of undertaking multiple engagements to the highest quality, safely and within budget.

Supagas is a leading supplier of LPG, industrial, medical, specialty and helium gases in Australia. We are a fast-growing nation-wide company and are rapidly building a reputation for growth and success based on an exceptional 'YES WE CAN' customer service offering and a quality product in the highly competitive market.

Today, Supagas has multiple distribution centres, branches and agencies growing nation-wide and is able to provide a fast and reliable delivery along with personal responses to queries, ensuring quality service every time.

Supagas' state-of-the-art facilities allows us to offer multiple gas types and gas products, as well as run specialised laboratories to mix and test specialty gas. This helps us to better service our customers' needs and requirements.

Our competitive advantage is based on reliable delivery, fast and personal responses to queries, and outstanding customer service.

Using innovation and big-picture thinking, Sync Lift Engineering is a small group of qualified professionals drawing on more than 77 collective years experience.

Dedicated to completing your projects on time and on budget, we ensure smooth delivery with minimal disruption and impact on production and asset availability.

We provide services in the following disciplines:

- Engineering
- Recruitment
- Field services
- Electrical services
- Jacking systems

With a reputation for innovation and excellence, we deliver market leading solutions for our clients by combining strong technical capabilities with robust systems.

Combining strong technical expertise with reliable delivery, we are well respected for our track record in providing the highest quality outcomes and practical solutions to our clients.

Responding to the needs of our customers, we have increased our service diversity, becoming known for our expertise across a wide range of applications.

Today, Furmanite is able to meet the complete program and project management needs of our customers, minimising downtime and maximising efficiencies.

We are a leading global provider of specialized industrial solutions aimed at minimizing costly downtime and maximizing equipment performance.

Our integrated services consist of inspection, heat treating, maintenance, repair, and asset integrity management solutions required in maintaining and installing high-temperature and high-pressure piping systems and vessels.

A professional team of experienced engineers, technicians, and client support personnel backs each service armed with the best training, equipment and technical support in the industry.

Test & Tag Gladstone will come to your premises or worksite and test and tag portable electrical appliances to Australian standards AS/NZS3760 & AS/NZS3012.

We provide professional services to the public, government, commercial and industrial sectors of central Queensland.

Since commencing operations in 2013 we have expanded our range of services from testing and tagging portable electrical items to now also include safety harness inspections and portable ladder inspections.

Our services now include:

- A visual check of the portable appliances to identify any problems or defects
- Electrical tests performed with one of the latest Portable Appliance Testers
- Tagging of all portable appliances and leads with next test due date
- Earth continuity, insulation resistance, polarity and current leakage tests
- Portable RCD (Residual Current Device) testing and trip times
- Computer generated report detailing appliances and test results
- Follow up reminders to ensure you remain compliant
- Microwave radiation leakage tests
- Free visual site inspection
- Safety harness inspections
- Portable ladder inspections

Servicing the Gladstone and Wide Bay Region, the Drug Detection Agency (TDDA) specializes in policy development, education and prevention programs and accredited mobile and on-site drug screening to Australasian businesses and departments in full compliance with Australian standards.

We are specialists in:

- Drug & alcohol testing services
- Drug & alcohol policy development
- 24/7 on-site / mobile accredited testing services
- Pre employment D&A testing
- Synthetic cannabis testing
- Hair testing
- Drug residue detection for properties
- Advance management drug abuse awareness
- Training
- Employee drug abuse education
- School & sport seminars
- Clandestine laboratory presentations and testing

For the past 15 years, The Guinea Group has been committed to making workplaces better for employees, by helping the leaders in those businesses to better understand how to help their teams increase their performance and their overall willingness to contribute to the organisation!

We know that the world has more leaders with influence, ready to step up, and to make a real difference, by empowering others, well here at TGG, we are committing to helping them do just that!

Triple A are a proud local company based in Central Queensland providing safety, health, first aid and other specialised services and products for over five years.

Triple A is comprised of the parent company Triple A Group (Australia) Pty Ltd and its subsidiary registered businesses including Triple A Safety, Risk & Compliance.

Triple A commenced operations in early 2010 as part of a vision of the three Anderson brothers. Their vision was to establish a company which offered quality products and services to various range of industries, organisations and business, i.e. whilst always Setting the Standard. Bringing the Triple A vision to reality is Alan Anderson who was elected by the then Triple A Board to the position of Managing Director.

In the short period of operation, Triple A has taken a measured approach to growth to ensure the sustainability of its business. This approach has allowed us to solidly grow our business enabling our operations to expand and diversify into many different industries; including mining, agriculture, construction and commercial. In diversifying and expanding where we work has required that we adapt and seemly increase and improve the services and products to which we offer our clients and partners.

Tropical Blue Homes is a local family owned and operated business established in 2008.

Ashley Glass began his carpentry apprenticeship in 1998 and has worked in the building industry for the past 18 years. A Gladstone local, Ashley has built his business on the foundations of outstanding personalised service and exceptional quality.

When choosing to build with us, you will be rewarded with a lifetime investment that you will be proud of.

We offer outstanding personalised service and exceptional quality.

We specialise in

- Customised homes including double-storey and split-level designs
- Renovations
- Extensions and alterations
- Outdoor living projects
- Commercial buildings

Established in 1926, Ulton is one of Queensland's largest and most dynamic firms of accountants, business advisors and wealth managers.

We help small to medium-size businesses and high net-worth individuals, achieve their financial goals.

We do this by providing the full suite of financial advisory services, tailored to each client's circumstances and requirements.

Ulton is a firm as rich in tradition, heritage and history as it is dynamic and progressive.

In our 90-plus years in operation, we have built a resilient, stable and secure business such that we're now one of Australia's leading mid-tier financial advisory firms.

As our strategy is to forge long-term partnership relationships, our commitment to our employees, clients and communities is both unwavering and lasting.

Ulton is committed to the advancement of small to medium-size businesses.

A large number of our business clients have been with our firm for many years and we have supported some of our family-owned business clients through generational changes.

We relish nurturing start-ups into regionally, nationally and globally-competitive players.

We take great satisfaction from helping businesses to successfully negotiate challenging conditions be they the need to identify and penetrate new markets, adjust to the digital economy, or anticipate and brace for economic downturns.

Universal Cranes Central Queensland opened in 2007, initially servicing just Rockhampton and later expanding into the region. Nowadays, Universal Cranes Central Queensland provides local crane hire solutions in Gladstone, Biloela, Rockhampton, Yeppoon, Emerald, Bundaberg and surrounding areas.

Universal Cranes began as a family crane hire business in 1993. While Universal Cranes has grown to become a national crane hire company, local families still own and operate our branches throughout Queensland and New South Wales. We are proud of all the unique stories that make up the history of our company.

We have a crane for any job.

Our crane hire fleet ranges from 3T to 600T.

Upton Engineering and Manufacturing is a locally owned company operating in the Gladstone region.

Established in 2017 we are a fresh, new engineering shop, offering a modern approach to all aspects of manufacturing and fabrication.

Our highly skilled team has been hand selected for their unparalleled skill within the industry, supported by a management team with over 65 years combined experience.

We have been involved with a myriad of precision CNC machining and fabrication projects ranging from high precision billet components in a variety of materials from 7075 aircraft grade aluminium, 4340 and EN26 high tensile steels, right through to 316 stainless steel marine applications.

We are a fully equipped CNC machine shop, with integrated 3D modelling and machining capabilities.

We also offer a comprehensive service for all your welding, fabrication and break down requirements, using the latest in welding technology, Millers and Fronius welders.

We are a true one stop shop for all your machining and fabrication needs.

We offer a 'One Stop Solution' with an array of technologies and products designed to assess and mitigate underground utility related risks associated with the design and construction of civil and infrastructure works.

Our services include non destructive excavation, trenching, potholing and footing excavation as well as high velocity pipe jetting, general vacuum removal, high pressure cleaning, confined space entry and equipment, CAD mapping and the provision of relevant DBYD plans.

Veolia delivers operational solutions across water, waste and energy that drive bottomline savings, and optimal sustainability performance for our customers.

Around the globe, we help cities and industries to manage, optimise and make the most of their resources.

We provide an array of solutions related to water, energy and materials, with a focus on waste recovery, to promote the transition toward a circular economy.

We design and deploy specialist solutions to provide, protect and replenish resources while increasing their efficiency from an environmental, economic and social standpoint.

Such initiatives are all part of our ongoing campaign to resource the world.

The Walz Group is one of Queensland's largest independently owned multi-disciplinary industrial infrastructure groups, with an exemplary track record across four decades in delivering construction and maintenance services to the resources, energy and infrastructure sectors.

Walz Group consists of a number of operating divisions, each of which is able to provide services independently, but which also enables an integrated services solution to be provided on projects on an as required basis.

Key project categories include:

- Coal, gold, copper and metal ores processing and materials handling plants
- LNG upstream and downstream facilities
- Coal export terminals
- Petro chemical plants
- Marine infrastructure
- Utilities infrastructure

Walz Group employs highly skilled staff across a range of resource infrastructure projects in Queensland and throughout Australia.

The company's continued growth and success comes from a commitment to employing the best people, understanding client needs and delivering jobs safely, on schedule and with assured quality.

Our club offers the best food and entertainment available in Gladstone in a modern, freshly refurbished environment.

At Yaralla Sports Club, there really is something for everyone.

Our history spans over 50 years of business in Gladstone.

Originally formed to organise sporting and related activities for the employees and their families of QAL, we have grown to now boast a membership base of around 45,000 with 12 active sports sub committees.

Today we offer two restaurants, a coffee shop, a bottle shop, five function spaces, two 24 hour gyms and a four and a half star Mercure Hotel.

We are one of Gladstone's most recognised and reputable construction companies specialising in industrial and commercial construction and maintenance.

We are a fourth generation company and have delivered many successful projects throughout the Gladstone region.

We have a strong track record and capability to plan, design, construct, service and maintain commercial and industrial projects.

We have also established a strong presence in the maintenance sector.

We work closely with our clients to maximise asset reliability and safety and drive down costs and operational risks.

Best practice performance and maintenance management systems are implemented across all our sites ensuring our client's performance targets are met.

Our core capabilities are:

- Industrial maintenance
- Structural concrete
- Reservoir construction & maintenance works
- Industrial & commercial buildings & refurbishments
- Demolition of existing structures
- Marine remediation
- Asset condition inspections & reporting for local authorities
- Plumbing
- Labour hire

At Zone, we combine a wealth of knowledge, experience and expertise to provide the best possible outcome for our clients.

We take a genuine, conscientious approach to our work and can guarantee the highest quality, every time.

Our mission is to solve real world problems in a real way through a refreshingly down to earth approach.

With extensive experience as the lead consultant in the management and delivery of a range of projects of varying complexity and scale, including high and medium density residential developments, master planned estates and mixed use buildings and estates, retail, commercial and industrial developments, tourism & community facilities, as well as the development of planning policy.

We have developed strong relationships with key personnel and decision makers in local & state regulatory authorities, including an extensive network of contacts with various industry professionals who ably assist with the delivery of projects on time & budget.
